The yearly number of new cases reported among Mauritians since 2005 is given in Table B. The decreasing trend observed from 2011 to 2015 was reversed in 2016 whereby 319 new cases were registered. The average number from 2017 to 2019 was 375. However, in 2020, it decreased to 318 most probably due to the decrease in the number of tests. The cumulative total since October 1987, when the first case of HIV/AIDS was reported, to June 2021 stood at 8,266.
