Annual Report

Volume 48

a publication of the
Health Records Division

MESSAGE

I am pleased to present the comprehensive Government Health Services Statistics (GHSS) Report 2022 on services and workload of the public health service, a vital pillar of our nation's well-being. As we navigate the complex landscape of public health, this document serves as a testament to our capability, commitment, accountability, and pursuit of better healthcare outcomes for all our citizens.

In an era defined by unprecedented health challenges, the importance of accessible and high-quality healthcare cannot be overstated. The statistics and insights contained in the GHSS Report reflect the tireless efforts of our healthcare personnel who work relentlessly for the welfare of our communities. Through their dedication and resilience, we have made significant strides in improving the health and wellness of our citizens.

This Report delves into the core areas of our health services, from primary care to specialised treatments. It outlines key performance indicators, such as service availability, outpatient and inpatient activities, patient outcomes, disease surveillance and quality of care backed by comparisons and trends, to provide a comprehensive view of our healthcare ecosystem. It is my hope that these insights will not only guide our policies and initiatives but also assist health personnel in their professional development, businesses to come up with innovative health infrastructure and equipment, equip our citizens with the knowledge to make informed decisions on their health and promote the research acuity in the population.

The GHSS Report informs us that the public health service has catered to 8,833,119 visits in 2022 and admitted 166,213 patients. It has also carried out 6,957 deliveries and 49,318 operations including 974 open heart surgeries, 7,846 cataract surgeries and 9 renal transplants. 15,086,869 laboratory tests and 767,692 x-ray examinations were carried out while 1,466 patients were administered 221,948 haemodialysis sessions.

In spite of the global pandemic, the morale of our health personnel has not dampened. Their unwavering dedication to the welfare of our citizens is truly commendable, and we owe them a debt of gratitude. In conclusion, this Report underscores our commitment to a healthier and more resilient nation.

I commend the efforts of all data producers and the Health Records Department and request them to continue with their good work for the benefit of our society.

A handwritten signature in black ink, appearing to read 'Jagutpal'.

Dr The Honourable Kailesh Kumar Singh JAGUTPAL
Minister of Health and Wellness

6th November 2023

FOREWORD

This Forty-eighth Volume of the Government Health Services Statistics Report, published by the Health Records Division of the Ministry of Health and Wellness, deals with activities of major health service departments of public health institutions. The health service delivery and medical data contained herein should be a useful tool for decision-making and policy formulation to administration, assist in research and should eventually blend in history.

Inappropriate data frequently point towards faulty service delivery systems. Data processing for this Report is a system review that realigns procedures and systems every year. This year, action has been initiated with the Laboratory, Physiotherapy, Smoking Cessation, SAMU and Diet and Nutrition services for improved data next year. It is also envisaged to work on missing Pharmacy and Human Resources data to give this Report a more extensive overview of the local public health service.

The ENT Isolation Centre was maintained in place in 2022 to accommodate emergency COVID-19 cases and isolation wards still functional at regional hospitals. Although the new appellation of Flacq Hospital is Dr Bruno Cheong Hospital, the former (FH) is still being maintained in this Report to facilitate referencing with previous ones. Routine activities of the ENT Centre were still conducted at Victoria Hospital while a new Autism Day Care Centre became operational in Triolet as from June 2022.

With the WHO-released ICD-11 (International Classification of Diseases, Eleventh Revision) for worldwide adoption as from 2022 and which introduces Traditional Medicine, local Ayurvedic clinics may wish to adopt it in the future to cater for its specific disease categorisation. New data of Orthopaedics Appliances Workshop has been introduced which gives greater clarity of the activities of this Department. Other support services which are not appropriately covered are kindly requested to liaise with this Office.

Data of previous years may differ from earlier Volumes of the Report owing to adjustments carried out consequent to availability of new information that were not reported earlier.

Activities of Rodrigues are reported separately with a summary provided herewith.

We wish to thank all service providers, Heads of Cadres, hospital authorities, Senior Health Records Officers and their staff and management at the level of this Ministry for their continued support. We are also grateful to management and health personnel in Rodrigues and Agalega Islands hoping to enjoy such loving support for years to come.

November 2023

S. Monohur
Chief Health Records Officer

CONVENTIONS

Alphabetical order of headings has been used as far as possible except for health institutions which have been grouped according to Health Region.

Shaded Cell	Service is not available
Blank Cell	Service exists and data of zero magnitude has been encountered
--	Data is not available
~	Number of beds for this specialty not specifically allocated
Italics	Used in figures for percentages, averages and decimal points
()	Data in brackets usually denote that they are included in that section
[]	See footnote

Health facilities are designated according to their geographical location as far as possible for easier identification.

Overview of the Public Health Service in 2022

Mauritius had an estimated mid-year resident population of 1,217,588 inhabitants in 2022 comprising 601,962 males and 615,626 females. 20.1% of the population was under 18 years of age, 60.3% was between 18 to 59 years and 19.6% was 60 years and above. Estimated mid-year resident population by Health Region was as follows: 313,589 inhabitants in Health Region I, 225,510 in Health Region II, 165,127 in Health Region III, 179,792 in Health Region IV and 333,570 in Health Region V.

Public health institutions are grouped under the five Health Regions and comprise 5 Regional Hospitals, 2 District Hospitals, 6 Specialised Hospitals, 2 Community Hospitals, 6 Mediclinics, 19 Area and 114 Community Health Centres. Under other specialised services, there is the Chest Clinic at Port Louis, an Ayurvedic Health Centre at La Source in Central Flacq, a wing of the Cardiac Centre of Pamplemousses at Victoria Hospital and the new Day-care Autism Centre at Triolet which was opened in May 2022.

Services at public health institutions are provided free of user costs to Mauritians.

Table 1: Distribution of Public Health Institutions by Health Region

	Region I	Region II	Region III	Region IV	Region V	TOTAL

Area Health Centre	6	1	4	3	5	19
Community Health Centre	25	28	24	16	21	114
TOTAL	35	37	31	23	31	158
Excluded : Infrastructure, tools and equipment and services provided by the Harm Reduction Unit and the Government Analyst Division						

The ENT Centre was housed at Victoria Hospital as the new premises were still used as COVID-19 Isolation Centre. The Cardiac Centre Wing at Victoria Hospital was not operational while Fertility Clinic was introduced as from February 2022 at SSRN Hospital.

All public health institutions, except for the Specialised Hospitals and Services, provide primary care and basic curative services. A referral system is in place for patients requiring specialist advice at the Sorted OPD. As from May 2022, more outpatient services are being introduced at primary health care centres. In the same vein of decentralisation, more specialist clinics have been set up at Mahebourg and Souillac Hospitals in Health Region IV. These will be cascaded onto the other Regions in the future.

Indicative hours of work of some main services are as follows.

Table 2: Hours of work

Service	Hours of Work
Unsorted OPD at Regional Hospitals	8.00hrs to 22.00hrs everyday At J Nehru Hospital, the location of the service changes as from 16.00hrs on weekdays, 12.00hrs on Saturdays and full-day on Sundays and Public holidays – registration of patients is carried out at the Accident and Emergency Department and patients are seen at the Orthopaedics OPD.
Unsorted OPD of J Nehru Hospital and Mahebourg Hospital	8.00hrs to 16.00hrs on weekdays 8.00hrs to 12.00hrs on Saturdays
Flu Clinics at Regional Hospitals - extended to Dr Yves Cantin Community Hospital	Operational on 24-hour basis since March 2020 Operational since December 2021 during normal working hours only
Sorted OPD consultations	8.00hrs to 16.00hrs on weekdays 8.00hrs to 12.00hrs on Saturdays (optional)
Mediclinics	8.00hrs to 21.00hrs except at L’Escalier Mediclinic which closes at 18.00hrs.
Area Health Centres , except Flacq, Rose Belle and Vacoas Club Rd AHCs Blood Collection	8.00hrs to 18.00hrs on weekdays 8.00hrs to 12.00hrs on Saturdays 9.00hrs to 12.00hrs on Sundays and public holidays 7.00hrs to 8.00hrs (on specific days)
Community Health Centres including Flacq, Rose Belle and Vacoas Club Rd AHCs 7 CHCs carry out extended sessions from 16.00hrs to 18.00hrs on specific days of the week and from 9.00hrs to 12.00hrs on Sundays and Public Holidays.	8.00hrs to 16.00hrs on weekdays 8.00hrs to 12.00hrs on Saturdays
Service departments	Usually between 8.00hrs to 16.00hrs on weekdays and from 8.00hrs to 12.00hrs on Saturdays. However, some departments do not operate on Saturdays.

Patient documentation is still paper-based in public health facilities.

Services available at public health institutions

Hereunder are listed major health-related services provided by public hospitals and primary health care centres, most of which basically include nursing, health records and pharmacy services.

Executive Summary - Mauritius

Following the COVID-19 pandemic of 2020 – 2021, activities started returning back to normal with the gradual waiving off of social distancing measures.

1.1 **Contacts at public health institutions**

8,833,119 contacts have taken place at the essential public health service points indicating activities were returning back to the 2019 pre-pandemic era. With an increase of 7.0% in attendances in 2022, average daily attendance has reached 24,200 visits but has yet to reach the 25,000+ visits of a normal year.

1.2 **Ambulatory attendances**

1.2.1 5,015,386 visits were registered at the Accident and Emergency Departments, Sorted and Unsorted Outpatient Departments of hospitals and primary health care facilities. Combined attendances of the Accident and Emergency Department, Unsorted and Sorted OPDs have increased by 16.6% and visits at primary health care centres by 18.4%.

1.2.2 467 specialist sessions at primary health care centres, that is, 10.7% of all planned sessions, did not have any patients.

1.2.3 Outpatient deaths have gone down by 5.5% with Victoria Hospital accounting for 16 deaths only at the Accident and Emergency Department compared to 33 – 47 cases of the other regional hospitals.

1.3 **Dental Service**

1.3.1 227,760 visits were encountered indicating 1.6% increase this year following consecutive drops over the years. In the last five years, workload has increased by 8.0% annually at the Endodontic Service and has dropped elsewhere.

1.4 **Ayurvedic Service**

Doctor consultations amounted to 40,263 visits indicating 2.7% increase while attendance for Panchakarma has almost doubled amounting to 2,253 cases.

1.5 **Support Services**

1.5.1 Activity at most service departments has increased except for drops of 52.4% in Podiatry, 10.6% at Smoking Cessation Clinics and 0.8% in Haemodialysis sessions.

1.5.2 Data of previous years show some 42% of yearly deaths among patients undergoing haemodialysis at public hospitals against 20% at private clinics.

1.6 **Inpatient Service**

1.6.1 3,594 beds were available on average during the year which accommodated 166,213 admissions for 924,009 days of stay. Bed occupancy was at 70.3% and average length of stay at 5.7 days.

1.7 **Deaths**

1.7.1 6,127 in-patient deaths occurred at public hospitals, including 256 cases at the ENT Isolation Centre indicating 4.7% decrease compared to 2021. Additionally, 206 patients died at the outpatient services while 708 were brought in dead.

1.8 **Patients awaiting surgery, procedure or radiological examination**

1.8.1 11,293 cases were either on waiting or booked lists indicating 1.4% drop against the previous year. It comprised 5,070 cases for surgery, 1,758 for procedures and 4,465 for specialised radiological examinations. Cases awaiting surgery have gone down by 36.6% and radiological examinations have increased by 165.3% while procedures were almost the same as last year.

1.8.2 Ophthalmology cases remained the highest this year too and constituted 78.4% of all cases awaiting surgery followed by only 359 cases in General Surgery among others.

1.8.3 Waiting time for surgery has gone down from 17.2 weeks in 2021 to 9.5 weeks in 2022 and procedures from 8.2 weeks to 7.8 weeks. In spite of long list of radiological examinations, its waiting time was 7.0 weeks.

1.8.4 241 cases of Cardiac Surgery, 2,608 cataracts, 148 cases of lithotripsy, 29 AV Fistula cases, 861 cases of angiography and 956 CT-Scans among others were waiting at the end of the year.

1.9 **Operation Theatre usage**

1.9.1 Operation Theatres were more judiciously used as the 3,070 unused planned operating sessions of 2022 represented 19.4% of total available operating sessions compared to 25.4% in 2021.

1.9.2 Both J Nehru and Dr A G Jeetoo Hospitals have once again reckoned the highest of unused theatre sessions. Patients were not available in a total of 1,488 sessions while 806 sessions remained idle.

1.10 **Surgeries Performed**

1.10.1 49,318 surgeries were carried out indicating 15.7% increase considering the drops of the last four years. Cardiac surgeries have been increasing for the fourth consecutive year at the Cardiac Centre while Souillac Hospital has registered 86.1% increase in ophthalmology surgeries.

- 1.10.2 Following drops of the previous years, 17 foreign teams have undertaken 21 visits in almost all main specialties. 810 outpatients were seen in 30 clinic sessions and 306 surgeries were carried out including 31 in Cardiac Surgery and 173 in Ophthalmology.
- 1.10.3 Only SSRN Hospital is regularly resorting to extra sessions to cater for elective surgeries in Paediatrics Orthopaedics.
- 1.11 **Deliveries**
6,957 deliveries took place at public hospitals depicting 11.4% drop while caesarean sections were the highest ever attained, representing 54.3% of all deliveries. Maternal deaths have gone down, perinatal deaths have also gone down accounting for 1.7% of all births while neonatal births have remained at 1.3% as in the previous two years. However, low birth weight and prematurity among newborns have increased to 23.2% and 9.6% respectively.
- 1.12 **Procedures, Examinations and Tests**
- 1.12.1 Most of the above have increased in 2022: angiographies by 21.0%, CT-Scan by 29.1%, endoscopies by 41.5%, ophthalmology laser by 51.4%, lithotripsy by 40.2%, MRIs by 32.4%, stress tests by 106.3% and tubal ligation by 4.5% among others.
- 1.12.2 Pathological tests have increased by 14.4% with more than 15 millions tests done and x-rays by 14.5% with more than 750,000 examinations.
- 1.13 **Surveillance of diseases and related conditions**
- 1.13.1 With the waiving of social distancing, Conjunctivitis, Gastroenteritis, Scabies and Upper Respiratory Tract Infection (URTI) cases have all increased. Conjunctivitis cases have increased by 36.6%, Gastroenteritis by 71.3%, URTI by 138.9% and scabies by 21.8%.
- 1.13.2 958 patients were following treatment for Type I diabetes including 111 children of under 15 years while new cases of Gestational Diabetes have again dropped for the third consecutive year amounting to 1,053 cases.
- 1.13.3 Domestic Violence cases have gone down for the fourth consecutive year. 859 cases were encountered showing 2.6% drop. However, cases have been increasing by 4.6% among males and going down by 16.0% in females annually in the last five years. 36 cases of abuse against children were registered, depicting consecutive drops in the last four years.
- 1.13.4 At Brown Sequad Mental Health Care Centre, new cases of behavioural and emotional disorders and Alzheimer disease have gone up by 95.5% and 60.0% respectively while cases of abuse of drugs and alcoholism have gone down by 23.3% and 28.9%.

1.13.5 First-time amputations have increased by 14.8% and represented 61.4% of the 746 non-traumatic amputations carried out. Total amputations have increased by 13.4%. 171 persons lost one leg through amputation in 2022 and 9 others have lost both feet.

1.13.6 The Chest Clinic reported 116 new cases of pulmonary tuberculosis indicating 39.8% increase after the drops of 2020 and 2021 directly resulting from the pandemic.

1.14 COVID-19 PANDEMIC

1.14.1 527 cases of COVID-19 were registered in 2020 starting as from March and continued with 24,421 cases in 2021.

1.14.2 In 2022, 19,964 cases of COVID-19 were encountered including 1,919 imported cases only in spite of resumption of air travel. In fact, no imported cases were encountered as from August 2022 while 1,850 local cases were recorded.

1.14.3 474 deaths occurred at Isolation Wards of regional hospitals and 256 at the ENT Isolation Centre. 248 of these deaths were attributed to COVID-19 directly.

Accident and Emergency Department and Unsorted OPD

- 2.1.1 Accident and Emergency Departments at all hospitals, Unsorted OPDs at Regional and Mahebourg Hospitals and Flu Clinics at Regional and Dr Yves Cantin Community Hospitals operated normally in 2022. Flu Clinic at Dr Yves Cantin Community Hospital was started in December 2021 and stopped in November 2022.
- 2.1.2 1,052,241 visits were registered at the Accident and Emergency Department of all public hospitals in 2022 including 3,595 cases of absent-on-call for consultation. 86.5% of consultations were new cases depicting 1.7% increase compared to the previous year.
- 2.1.3 Unsorted OPD at Regional Hospitals and Mahebourg Hospital have encountered 446,709 visits including 2,776 absent-on-call cases. New cases accounted for 95.8% of consultations, an increase of 0.6% as opposed to 2021.

Table 9: Attendance at Accident and Emergency Department and Unsorted OPD - 2022

- 2.1.4 Flu Clinics at Regional Hospitals and Dr Yves Cantin Community Hospital have attended to 356,210 influenza-like-illness (ILI) cases. 14,642 polymerase chain reaction (PCR) tests were performed backed by rapid antigen tests (RAT) for confirmation of Covid-19.
- 2.1.5 Significant surge of ILI and COVID-19 cases was registered at Flu Clinics in February and March 2022. Monthly attendance which was around 21,000 visits at Flu Clinics rose to 80,550 and 64,712 in February and March respectively while reported COVID-19 cases were 5,833 and 4,920 against an otherwise average of 1,000 cases per month.

- 2.1.6 Attendance has increased by *19.8%* at the Accident and Emergency Department, *47.5%* at the Unsorted OPD and *11.0%* at Flu Clinics. Combined attendance of the three departments has increased by *23.5%* in 2022.
- 2.1.7 Average attendance at Accident and Emergency Department of all hospitals has increased to *2,737* cases per day, *1,301* cases at the Unsorted OPD and *1,168* cases at Flu Clinics.
- 2.1.8 Among Regional Hospitals, Dr A G Jeetoo Hospital and Victoria Hospital have catered to around *1,000* cases per day, *760* cases by SSRN Hospital and *600* cases at Flacq and J Nehru Hospital. As regards the remaining hospitals, S Bharati Eye Hospital catered for some *300* cases per day followed by *200* cases at Souillac Hospital, *175* at Mahebourg Hospital and ENT Centre, *125* at Dr Yves Cantin Community Hospital and *100* cases at Montagne Longue Hospital.
- 2.1.9 Mondays were still the busiest day of the week with some *3,194* visits decreasing to *2,272* cases on Sundays. Peak hours of work were still between 8.00hrs to 12.00hrs at almost all hospitals.
- 2.1.10 531,126 radiology examinations were carried out at the Accident and Emergency Department and Unsorted OPD of hospitals indicating *10.8%* increase compared to 2021. 33,913 patients (*6.4%*) returned to collect their Dry Film Reports subsequently.

2.2 Deaths

- 2.2.1 206 deaths have occurred at the Accident and Emergency Department and primary health care centres, out of which 180 took place at Regional Hospitals. Victoria Hospital reported 16 such deaths only while the other Regional Hospitals had between 33 to 47 deaths. It is also to be pointed out that Mahebourg Hospital reported 6 deaths in 2021 and 9 in 2022 and Goodlands Mediclinic reported 3 deaths in 2021 and 5 in 2022.
- 2.2.2 Death was attributed to diseases of the Circulatory System in 111 cases, 32 to those of the Respiratory System and 17 due to injury.
- 2.2.3 Cases have gone down by *5.5%* in 2022 but pinpoints towards *2.6%* increase annually for period 2018 – 2022.
- 2.2.4 Additionally, 708 brought-in-dead cases were encountered depicting *3.9%* average increase annually for the last five years.
- 2.2.5 Of the 914 deaths encountered at health institutions, 272 of the persons who died were between 40 to 59 years while 516 were 60 years and above.

2.2.6 61 deaths occurring at facility level were referred to the Police Medical Officer in addition to 403 brought-in-dead cases.

Sorted OPD

The Sorted Outpatient Department caters for patients requiring regular follow-ups by specialists through an appointment system. However, off-appointment cases are accommodated on a needs basis.

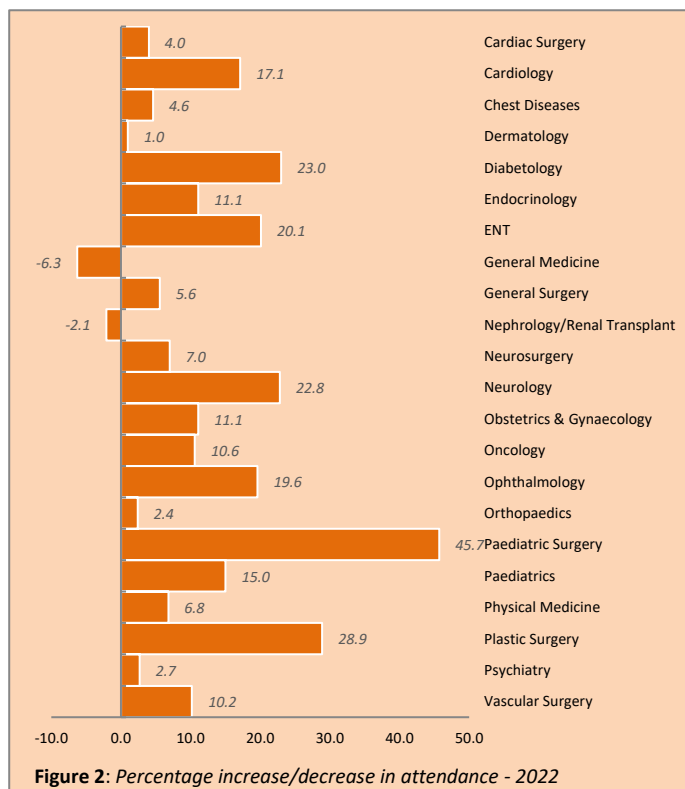

- 3.1.1 Decentralisation of specialist services to district and community hospitals and primary health care centres was started as from April – May 2022 with major increases of sessions at Mahebourg and Souillac Hospitals.
- 3.1.2 Posts of specialists have increased since the last three years and have moved from 297 in 2021 to 307 in 2022.
- 3.1.3 662 clinic sessions were planned in a week at hospitals consisting of 603 specialist and 59 MHO sessions. Additionally, 11 clinic sessions were carried fortnightly and 12 sessions on monthly basis.
- 3.1.4 33,377 outpatient clinic sessions were held including 393 unscheduled sessions, indicating an increase of 2.8%. 27,377 sessions were conducted by specialists and 6,000 by Medical and Health Officers.
- 3.1.5 Individual specialists have conducted 1 to 2 sessions per week in all specialties except for Dermatology, ENT, Gastroenterology and Physical Medicine where they have carried out more sessions per week.
- 3.1.6 Based on actual attendances, 24,888 clinic sessions (74.6%) have catered for less than 40 cases per session followed by 5,393 sessions (16.2%) having seen between 40 - 59 cases, 2,168 sessions (6.5%) have seen between 60 - 79 cases, 753 sessions (2.3%) between 80 - 99 cases and 175 sessions (0.5%) have catered for more than 100 cases.
- 3.1.7 Victoria Hospital has conducted 884 sessions of more than 60 cases followed by 672 sessions at SSRN Hospital, 466 at Dr A G Jeetoo Hospital, 360 at S Bharati Eye Hospital, 326 at Flacq Hospital, 270 at J Nehru Hospital, 44 at Souillac Hospital, 37 at Brown Sequard Mental Health Care Centre, 18 at the Chest Clinic and 17 at Mahebourg Hospital.
- 3.1.8 955,910 cases were treated at the Sorted Out Patient Department of hospitals depicting 8.4% increase in activities in 2022. Additionally, Primary Health Care Centres have encountered 45,321 visits.
- 3.1.9 New cases have gone up to 144,090 cases depicting 17.0% increase this year.

3.1.10 Victoria Hospital has catered for the highest number of cases (237,901) as usual while Flacq Hospital has recorded the lowest of 104,967 cases among Regional Hospitals. Attendance has gone up at all hospitals except for 12.8% drop at Chest Clinic, Port Louis. Cardiac Centre has registered 41.1% increase in attendance with an additional 6,500 visits, and ophthalmology services with 38.4% increase at Souillac Hospital and 15.0% at S Bharati Eye Hospital.

3.1.11 For once, the Department of Cardiology has treated the highest number of 129,151 cases followed by 117,190 cases at Orthopaedics, 99,378 by General Medicine, 89,359 by General Surgery, 84,501 by Obstetrics and Gynaecology, 80,427 cases by Ophthalmology, 69,745 by Psychiatry, 54,316 by Oncology and 30,883 by Physical Medicine while the rest have catered less than 30,000 cases.

3.1.12 Attendance has increased at all specialties except for 6.3% drop at General Medicine and 2.1% at Nephrology services.

3.1.13 3,165 cases were seen on average daily at outpatient departments indicating an increase of some 50 cases. Victoria Hospital has seen some 790 cases per day followed by 537 at SSRN Hospital, 488 at Dr A Jeetoo Hospital, 372 at J Nehru Hospital and 353 at Flacq Hospital among regional hospitals. While S Bharati Eye Hospital has catered to some 199 cases and the Cancer Centre to 101 cases daily, the remaining hospitals have seen less than 100 cases in 2022.

3.1.14 The ratio of New Cases to Follow-Ups has remained at 1:6 since 2017.

3.2 Off-appointments

3.2.1 ENT Centre did not entertain off-appointments at the outpatient department as they are seen on the same day at its Accident and Emergency Department.

3.2.2 15,873 patients turned up outside of their appointment and were seen at their respective specialist clinics which represented 1.7% of total outpatient attendances. Victoria Hospital has catered to 4,164 such cases followed by 2,357 cases at SSRN

Hospital, 1,603 at Dr A G Jeetoo Hospital, 1,490 at J Nehru Hospital, 1,348 at Brown Sequard Mental Health Care Centre and 1,155 cases at the New Cancer Centre. The remaining hospitals have individually seen below 1,000 cases with the smallest of 94 cases at ENT Centre.

3.3 DNA (Did Not Attend)

3.3.1 337,360 cases did not attend on appointment in 2022 representing 26.4% of total scheduled appointments. J Nehru Hospital has recorded 33.7% of DNAs followed by 31.4% at ENT Centre, 30.5% at Dr A G Jeetoo Hospital and 30.1% at Brown Sequard Mental Health Care Centre while the remaining hospitals have registered less than 30% of cases. The New Cancer Centre has recorded the least of 2.7% DNA cases.

3.3.2 59.7% of DNAs were recorded at Geriatric clinics followed by 33.4% in Dermatology, 32.6% in Psychiatry, 32.4% in General Medicine, 31.2% in Paediatrics, 30.9% in Orthopaedics and 30.8% in ENT while the other specialties have recorded less than 30% of cases. The Department of Oncology has received the least of 7.9% DNAs.

3.4 Waiting Time

3.4.1 New patients did not have to wait in the specialties of Psychiatry at Brown Sequard Mental Health Care Centre and Neurosurgery clinics at Victoria Hospital as they were seen by specialists on the very day of attendance. At Dr Yves Cantin Community Hospital, new cases were seen at the next available outpatient session.

3.4.2 Average Waiting Time of new patients was 2.9 weeks while the highest was 3.8 weeks at S Bharati Eye Hospital and the lowest of 1.2 weeks at Cancer Centre and Long Mountain Community Hospital.

3.4.3 Longest waiting time was 5.6 weeks at Ophthalmology clinics followed by 5.5 weeks at Early Dementia clinics, 4.2 weeks at the Department of Neurology and 4.0 weeks at Cardiology. The Neurosurgery Department reckoned the shortest waiting time of 1.4 weeks only.

3.4.4 Exceedingly long waiting times have increased at Ophthalmology Clinics of Flacq Hospital from 11.3 weeks in 2021 to 13.7 weeks now followed by 9.7 weeks at Dr A G Jeetoo Hospital, 7.7 weeks in the Department of Cardiology at J Nehru Hospital and 5.5 weeks at Early Dementia clinics at Victoria Hospital.

3.5 Emergency cases seen by MHOs

3.5.1 Emergency cases referred to specialists are usually seen at the Accident and Emergency Department for General Medicine, General Surgery, Orthopaedics and Psychiatry cases while Obstetrics and Gynaecology cases are attended at their

- respective outpatient department at all hospitals. At Victoria Hospital, cases of Cardiology are seen at the Cardiac Unit while at Flacq Hospital, all children are seen by the Paediatrics MHO directly.
- 3.5.2 409,592 visits were encountered in 2022 comprising 131,699 cases at Dr A G Jeetoo Hospital followed by 84,826 cases at SSRN Hospital, 81,868 at Victoria Hospital, 69,233 at J Nehru Hospital and 41,966 cases at Flacq Hospital.
- 3.5.3 The Department of General Medicine has treated the highest number of 79,054 cases followed by 78,672 by Paediatrics, 76,147 by Orthopaedics, 59,027 cases by Obstetrics and Gynaecology, 57,132 by General Surgery, 56,952 by Cardiology and 2,608 by the Department of Psychiatry.
- 3.5.4 1,122 patients were seen on average per day with 217 cases by General Medicine, 216 by Paediatrics and 209 by Orthopaedics.
- 3.5.5 Following drops of the previous three years, attendance has increased by 8.6% in 2022 but indicates 2.4% drop annually between 2018 and 2022.
- 3.6 Specialist Clinics at Primary Health Care Centres** (refer Page 113-114)
- 3.6.1 Decision was taken to delocalize chronic cases from hospitals to new specialist clinics at district and community hospitals and primary health care centres as from April 2022. 13 new specialist clinics were thus launched in 2022 in addition to the 115 existing ones.
- 3.6.2 Outpatient clinic sessions have gone up from 3,673 in 2021 to 4,375 in 2022. Consequently, attendance has reached 45,321 cases depicting 32.5% increase.
- 3.6.3 Cases seen by specialists included 25,584 visits in the Department of Diabetology representing 56.5% of all cases. Thereafter, the Department of Psychiatry had attended to 9,611 cases followed by 6,178 by Obstetrics and Gynaecology and 1,402 by General Medicine while the other specialties of Chest Diseases, Dermatology, Ophthalmology, Orthopaedics, Paediatrics and Physical Medicine have seen less than 1,000 cases each.
- 3.6.4 An average of 10 cases was seen per session with the highest of around 15 cases seen by Diabetologists per session and 1 –2 cases per session by the specialties of Chest Diseases, Orthopaedics and Paediatrics.
- 3.6.5 Diabetology clinics at Rose Belle AHC have seen an average of 32 cases per session and 25 cases at Psychiatry clinics of Terre Rouge CHC. On the other hand, Orthopaedics sessions had only 1 case per session whereas several Paediatrics sessions did not have any visit.

Dental Service

4.1 Dental Service

4.1.1 Essential dental services including care and treatment, dental extractions, fillings and scaling, were provided at 45 service points comprising Regional, District and Community Hospitals, Brown Sequard Mental Health Care Centre, Mauritius Prisons and 34 primary health care centres. Full-week service was available at 32 service points and part-time service for 3 days in a week at 9 service points.

Table 10: Attendance 2022

Service	Attendance
Dental	206,866
Endodontics	6,411
Oral Surgery	7,898
Orthodontics	5,827
Outdoor Visits	758
Total	227,760

4.1.2 Overall attendance was 227,760 indicating 1.6% increase in 2022. 206,866 visits were encountered at General Dental Service, 7,898 at Oral Surgery, 6,411 at Endodontics Service, 5,827 at Orthodontics clinics and 758 cases during outdoor visits.

4.2 General Dental Service

4.2.1 206,866 cases were treated at public health institutions where hospitals have catered for 55,631 cases (26.9%), 38,613 (18.7%) by mediclinics, 85,122 (41.1%) by AHCs and 27,500 (13.3%) by CHCs.

4.2.2 An average of 18 cases was seen daily with the highest of 28 cases at Ste Croix CHC and the lowest of 11 cases at Midlands CHC.

4.2.3 46,226 permanent tooth extractions were carried out comprising 482 extractions on children and 45,744 on adults. Additionally, 11,011 deciduous tooth extractions were carried out on children.

4.2.4 Extraction of deciduous teeth in children has been going down over the years and has once again gone down by 8.6% this year. Extraction of permanent teeth in children which was going down since 2017 has increased by 30.6% in 2022. However, overall extraction of permanent teeth has gone down by 0.7% this year.

4.2.5 Dental filling was performed on 6,976 children showing a drop of 9.1% while it has increased by 4.5% in adults.

4.2.6 Scaling has increased by 27.0% after having gone down in 2021 while application of Pit and Fissure Sealant has gone down by 81.3% from 336 in 2021 to 63 in 2022.

4.2.7 Attendance at General Dental Service has been going down over the years and has once again gone down this year. This 0.3% drop of 2022 has resulted in an average 6.6% decrease annually in these last five years.

4.3 Endodontics

- 4.3.1 The Service was available for the whole week at Dr A G Jeetoo Hospital, SSRN Hospital and Phoenix CHC, four days at Victoria Hospital and two days at Souillac Hospital.
- 4.3.2 6,411 visits were registered in 2022 comprising 2,430 new cases and 3,981 follow-ups.
- 4.3.3 Root canal treatment was provided to 56.7% of all visits while 6 cases on average were seen per session.
- 4.3.4 Attendance has increased by 39.6% in 2022 and 8.0% on average annually in the last five years. This is the first time that attendance at this Service has encountered more than 6,000 visits.

4.4 Oral Surgery

- 4.4.1 The Service was available at Dr A G Jeetoo Hospital, SSRN Hospital, J Nehru Hospital and ENT Centre.
- 4.4.2 7,898 visits were registered comprising 3,935 (49.8%) non-surgical and 3,963 (50.2%) surgical interventions. Visits have increased by 17.8% in 2022 after drops in 2020 and 2021.
- 4.4.3 ENT Centre has catered for 29.1% (2,297) of the cases followed by 26.2% (2,069) at Dr A G Jeetoo Hospital, 26.0% (2,054) at SSRN Hospital and 18.7% (1,478) at J Nehru Hospital. Attendance has increased at all health institutions with marked increases of 28.9% and 28.7% at SSRN Hospital and J Nehru Hospital respectively. New cases accounted for 45.6% of total attendance and 8 cases were seen on average per session.
- 4.4.4 Attendance has increased by 17.8% in 2022 but showed an average annual decrease of 7.1% for period 2018 to 2022. New cases have increased this year after five years.

4.5 Orthodontics

- 4.5.1 Orthodontics Service was available for the whole week at SSRN and Victoria Hospital, two days a week at Dr A G Jeetoo Hospital and only once at J Nehru Hospital as in 2021.
- 4.5.2 5,827 visits were recorded in 2022 comprising 525 new cases and 5,302 follow-ups. An average of 9 visits was recorded daily with the highest of 14 visits at J Nehru Hospital and the lowest of 6 visits at Victoria Hospital.

4.5.3 Dr A G Jeetoo Hospital has carried out only 3 laboratory sessions followed by 25 at Victoria Hospital, 94 at SSRN Hospital and 292 at J Nehru Hospital.

4.5.4 Attendance has increased by 7.5% in 2022 but showed an average annual decrease of 1.9% for period 2018 to 2022.

4.6 Outdoor Activities

4.6.1 Outdoor visits were conducted at eighteen (18) sites where 758 children were exclusively screened. 55 dental extractions were carried out including 41 permanent tooth extractions. Dental filing was performed on 80 children and Scaling on 44 children.

4.7 Overall

4.7.1 Overall attendance at Dental Services which was going down in the preceding years has increased by 1.6% this year but still showed an average drop of 6.3% every year for period 2018 to 2022.

4.7.2 After drops of the preceding years, attendance has increased at all specialised services in 2022.

Ayurvedic Medicine Service

- 5.1.1 Ayurvedic Medicine Service was available at six service points throughout the island. Panchakarma therapy was introduced at Plaine Verte Mediclinic in June 2022 and was thus available at all centres except La Source Ayurvedic Clinic. Classification of diseases in this Service differs from that of mainstream medicine.
- 5.1.2 All service points have conducted between 8 - 11 consultation sessions per week in 2022. However, overall sessions have gone down by 2.3% this year after continuous increases in the previous years.
- 5.1.3 40,263 cases were seen in 2,861 consultation sessions with average attendance per session being 14 cases but ranging between 10 - 20 cases at service points. Attendance has increased by 2.7% after the consecutive drops of 2020 and 2021.
- 5.1.4 Attendance has increased at all centres except at Plaine Verte and L'Escalier Mediclinics which have reckoned drops of 13.5% and 0.5% respectively.
- 5.1.5 New cases which have been going down since 2019 have increased by 10.6% in 2022 with a significant increase of 51.0% at Victoria Hospital. They have however gone down by 7.3% at Plaine Verte Mediclinic and 3.0% at La Source Ayurvedic Centre.
- 5.1.6 Additionally, the Panchakarma Service registered 2,253 cases compared to 1,147 in 2021 mainly due to 57.0% increase at Belvedere Mediclinic and new services introduced at Plaine Verte Mediclinic. 70.0% of the cases were carried out at Belvedere Mediclinic where the service functioned normally while it was sporadically carried out at the other institutions. New cases represented 21.4% of total attendance.
- 5.1.7 The Haemopoetic System once again had the highest of 2,920 cases followed by 2,765 cases of Skeletal Diseases, 2,557 cases of the Alimentary System and 2,410 cases of Head and Neck Diseases. New cases of diabetes have gone down by 14.8% in 2022 culminating in 1,427 cases comprising 62.6% of females.
- 5.1.8 With total visits arising to 42,516, overall attendance has increased by 5.3% this year after drops in 2020 and 2021. Total visits indicated a 3.1% annual drop in the five-year interval of 2018 - 2022.

Support Services

Support Services provide professional back-up to doctors in the care and treatment of patients and include the following professional groups among others: Clinical Psychology, Diet and Nutrition, Foot Care, Haemodialysis, Hydrotherapy, Hyperbar Medicine, Medical Social Service, Occupational Health Medicine, Occupational Therapy, Orthopaedic Appliances Workshop, Physiotherapy, Podiatry and Foot Care, Retinal Screening, Smoking Cessation and Speech Therapy and Audiology.

6.1 Autism Day Care

6.1.1 An Autism Day Care Centre was started at Triolet as from June 2022 and 41 patients have been registered as at December. 188 general consultations have been carried out and 181 occupational therapy, 118 psychiatry, 114 psychology and 113 speech therapy consultations were conducted.

6.2 Clinical Psychology

6.2.1 This Service is available at Regional Hospitals and Brown Sequard Mental Health Care Centre.

6.2.2 14,501 cases were treated in 3,144 sessions indicating 2.5% increase in sessions, 8.0% in new cases and 16.5% in attendance in 2022. SSRN Hospital has registered 51.2% increase. New cases represented 30.1% of all attendances.

6.2.3 Attendance was the highest compared to previous years and showed an annual increase of 15.9% for period 2018 – 2022.

6.3 Diet and Nutrition

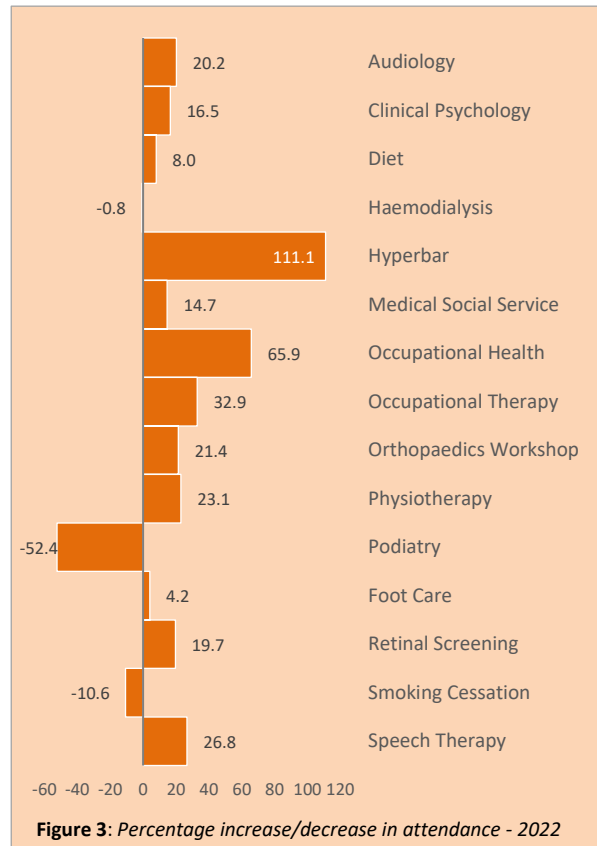

6.3.1 Sessions were held at Regional, District and Community Hospitals and 50 Primary Health Care Centres.

6.3.2 33,771 cases were seen in 4,361 sessions at hospitals while Primary Health Care Centres additionally catered for 10,080 cases in 1,133 sessions.

6.3.3 118 talks were carried out and 2 Mobile Kitchen Demonstrations were held.

6.3.4 New cases comprised 61.4% of all visits also showed 16.7% increase compared to 2021.

6.3.5 Attendance has increased by 8.0% in 2022 and 0.2% annually for period 2018 – 2022.

6.4 Haemodialysis

6.4.1 Haemodialysis is carried out at all Regional Hospitals, Long Mountain Community and Souillac Hospital. 203 dialysis machines were available at public hospitals and 72 in six private clinics with 3 sessions carried out by each machine on average every day.

6.4.2 1,246 patients were administered 186,454 dialysis sessions at public hospitals and 35,494 sessions to 220 patients in private clinics amounting to 221,948 sessions for 1,466 patients.

6.4.3 Patients have increased by 0.5% in 2022 while sessions have gone down by 0.8%. As for period of 2018 to 2022, machines have increased by 4.4% on average every year, patients by 1.9% and sessions by 2.2%.

6.4.4 526 deaths have occurred at public hospitals and 32 at private institutions. Data of previous years show some 42% of yearly deaths among patients undergoing haemodialysis at public hospitals against 20% at private clinics.

6.5 Hydrotherapy

6.5.1 No sessions as swimming pool have been out of order since 2019.

6.6 Hyperbar Medicine

6.6.1 Available at Victoria Hospital only, 33 patients have accessed the service 76 times in 2022.

6.6.2 Usage of this service has been erratic over the years partly due to machine breakdown.

6.7 Medical Social Service

6.7.1 The Medical Social Service was available at all hospitals except Long Mountain Community Hospital. Medical Social Workers posted at Regional Hospitals performed outdoor visits also.

6.7.2 The Department attended to 27,524 cases indicating 14.7% rise in 2022. Attendance included 4,894 (17.8%) new cases showing an increase of 18.7% this year following drops of 2020 and 2021.

6.7.3 8,788 cases were recorded at Brown Sequad Mental Health Care Centre followed by 5,163 cases at Dr A G Jeetoo Hospital, 4,785 at SSRN Hospital, 3,731 at Victoria Hospital and less than 2,500 cases at the remaining ones. Cases have increased at all health institutions in 2022 except Dr Yves Cantin Community Hospital where only 13 attendances have been registered.

6.7.4 Medical Social Workers have conducted 2,127 psycho-social enquiries and attended to 793 cases of General Welfare Assistance. They have also attended to 321 cases of teenage pregnancy, 154 child abuse cases, 179 cases of attempt at suicide, 193 Domestic Violence, 134 sexual abuse and 101 depression cases among others. They have also carried out 864 home and outdoor visits and attended to 758 repatriation cases.

6.7.5 New cases of child abuse have gone down by 21.4%, depression by 5.6%, attempt at suicide by 4.8% and sexual abuse by 2.2%. However, Domestic Violence new cases have increased by 50.8%. New cases on the whole have increased by 18.7% in 2022.

6.7.6 Attendance has increased by 14.7% in 2022 and 6.4% annually for period 2018 to 2022.

6.8 Occupational Health Medicine

- 6.8.1 Clinics were held thrice weekly at J Nehru and Victoria Hospital, twice weekly at Dr A G Jeetoo Hospital, SSRN Hospital and Flacq Hospital and once weekly at Mahebourg Hospital. Visits were also carried out at worksites.
- 6.8.2 8,583 visits were registered in 671 sessions with an average of 13 cases per session. As in the preceding years, highest attendance was registered at Victoria Hospital with 2,476 visits which was followed by 1,885 visits at J Nehru Hospital.
- 6.8.3 New cases have increased immensely with 2,217 cases in 2022 compared to the highest of 1,442 cases in 2018. J Nehru Hospital which usually recorded less than 100 new cases every year, has catered for 564 new ones in 2022.
- 6.8.4 Activity has gone up at all hospitals but with major rise of 178.4% at J Nehru Hospital and 120.1% at Victoria Hospital.
- 6.8.5 Attendance has increased by 65.9% in 2022 and 5.1% on average annually for period 2018 to 2022.

6.9 Occupational Therapy

- 6.9.1 Occupational Therapy Service was available at Dr A G Jeetoo Hospital, SSRN Hospital, Flacq Hospital, J Nehru Hospital, Brown Sequad Mental Health Care Centre and ENT Centre. The latter was re-opened this year after being closed in 2021 due to COVID-19.
- 6.9.2 28,136 cases were seen in 2022 including 3,265 (11.6%) new cases which has increased by 9.1%.
- 6.9.3 Attendance has gone up at all hospitals except Dr A G Jeetoo Hospital accounting for 32.9% increase.

6.10 Orthopaedics Appliances Workshop

- 6.10.1 This Service was available at all Regional Hospitals which provided inpatient service. However, outpatients of Dr A G Jeetoo Hospital and Victoria Hospital opt to attend the Workshop at Beau Bassin instead of waiting for the monthly hospital sessions.
- 6.10.2 The department has catered for 23,079 visits comprising 1,451 inpatients and 21,628 outpatient visits. As in the previous years, SSRN Hospital has registered the highest of 5,327 cases followed by Flacq Hospital with 3,357 cases, 1,774 cases at J Nehru Hospital, 542 cases at Victoria Hospital and 271 cases only at Dr A G Jeetoo

Hospitals. However, the Beau Bassin Workshop has catered for 54.6% of all outpatients with 11,808 cases.

- 6.10.3 16,636 appliances were produced and supplied to patients including 6,081 belts, 5,348 braces, 1,590 pads and 1,298 collars among others. Additionally, 774 repairs were effected.
- 6.10.4 Activity has gone up by 19.5% in 2022 including 22.1% increase in supply of appliances and 7.8% for repairs. Activity has thus increased by 2.4% annually in the five-year interval of 2018 - 2022.

6.11 Physiotherapy

- 6.11.1 The Service was available at Regional and District Hospitals. 114,635 cases were seen consisting of 73,907 outpatients and 40,728 inpatients. 32,673 new patients were registered representing 28.5% of all cases. After successive drops in the preceding years, new cases have gone up by 18.7% in 2022.
- 6.11.2 As usual, Victoria Hospital catered for the highest of 31,969 visits followed by 26,866 cases at SSRN Hospital, 20,477 cases at Flacq Hospital, 18,924 cases at Dr A G Jeetoo Hospital and 11,350 cases at J Nehru Hospital.
- 6.11.3 After having gone down for the last four years, attendance has increased by 23.1% in 2022 but indicated an average annual drop of 7.9% for period 2018 - 2022.

6.12 Podiatry and Foot Care

- 6.12.1 Podiatry Service was available at Victoria Hospital and Souillac Diabetes and Vascular Health Centre only. Foot Care clinics were carried out at Regional Hospitals except SSRN Hospital but transferred to Goodlands Mediclinic as from June 2018. Furthermore, the service was also available at Souillac Diabetes and Vascular Health Centre, Long Mountain Community Hospital, Dr Yves Cantin Community Hospital and nine Primary Health Care Centres.
- 6.12.2 1,310 cases were seen at Podiatry clinics in 181 sessions. Activity has gone down by 52.4% this year and is the lowest in the last ten years. This drop is attributed to closure of service at Souillac Hospital owing to unavailability of staff.
- 6.12.3 Victoria Hospital has catered for 80.3% of attendances in 2022 with an increase in sessions.
- 6.12.4 At Foot Care clinics, although doctors were seeing patients before, this is the first year that these attendances are being reported upon owing to data unavailability.

- 6.12.5 38,580 cases were seen at Foot Care Clinics of hospitals comprising 35,427 cases attended by nurses and 3,153 by doctors.
- 6.12.6 Cases attended by nurses have gone up by 4.2% including 65.9% increase at SSRN Hospital and 22.7% decrease at Dr A G Jeetoo Hospital.
- 6.12.7 Overall attendance of 39,890 cases at Podiatry and Foot Care Services showed a rise of 8.5% in 2022 and an average annual increase of 1.8% every year from 2018 to 2022.

6.13 Retinal Screening

- 6.13.1 Retinal Screening was available at the Souillac Diabetes and Vascular Health Centre, Belvedere Mediclinic and all Regional Hospitals except Flacq Hospital.
- 6.13.2 31,587 patients were screened with increases noted at all health institutions. However, SSRN Hospital has recorded 1.1% increase as compared to the others reporting between 21% to 43% increase.
- 6.13.3 Attendance has increased by 19.7% in 2022 with an average annual increase of 0.3% for period 2018 - 2022.

6.14 Smoking Cessation Clinics

- 6.14.1 Provided by doctors and nursing personnel at eight public health institutions, services related to cessation of smoking include brief interventions, intensive counseling, pharmacotherapy and relapse prevention.
- 6.14.2 1,915 visits were recorded including 559 (29.2%) new cases. J Nehru Hospital has catered for the highest number of 370 visits followed by 360 cases at Victoria Hospital, 342 at Dr A G Jeetoo Hospital, 302 at SSRN Hospital but less than 200 cases at the remaining four clinics.
- 6.14.3 New cases have increased by 12.0% in 2022 after successive drops in the last four years but indicated a drop of 7.0% annually from 2018 - 2022.
- 6.14.4 Total attendance has gone down by 10.6% in 2022 and 5.3% annually for period 2018 - 2022.

6.15 Speech Therapy and Audiology

- 6.15.1 Speech Therapy and Audiology Services were available at Regional Hospitals except Victoria Hospital as it was provided at the ENT Centre. Audiology Service at Flacq Hospital has been reckoning low attendances over the years as only Adult and

- Child Rehabilitation service is available. Five new tests have been introduced as from May 2022 at all facilities.
- 6.15.2 10,194 cases including 1,549 new patients were seen by the Speech Therapy Service in 2,744 sessions in 2022.
- 6.15.3 Frequently encountered complaints consisted of delayed speech with 830 new cases followed by 285 cases of Loss of Power of Expression and 199 cases of Early Intervention. While new cases in all complaints are on the downward trend, cases of delayed speech are however increasing every year.
- 6.15.4 New cases have increased by 4.3% in 2022 and attendance was the highest compared to previous years.
- 6.15.5 Attendance has increased by 11.6% in 2022 involving all service points but has gone down by 1.2% annually from 2018 to 2022.
- 6.15.6 At the Audiology Unit, 9,455 tests were carried out. This year, Floreal Mediclinic has registered the highest attendance of 4,504 cases followed by 3,397 cases at J Nehru Hospital, 1,213 at Dr A G Jeetoo Hospital and 319 cases at ENT Centre. 1,806 sessions were held with an average of 5 tests conducted per session.
- 6.15.7 2,645 tests of Pure Tone Average were carried out followed by 1,773 cases of Tympanometry, 1,699 of Reflexes, 1,311 of Adult Rehabilitation, 1,001 of Masking and less than 400 for the remaining ones.
- 6.15.8 Increase in attendance has been encountered at Floreal Mediclinic and J Nehru Hospital but has gone down at SSRN Hospital and Dr A G Jeetoo Hospital.
- 6.15.9 Attendance has increased by 20.2% in 2022 after successive drops in the previous years but indicated an average annual decrease of 7.6% for period 2018 to 2022.

Cases Awaiting Surgery, Procedure or Examination

Surgeries and procedures are carried out at Regional Hospitals, S Bharati Eye Hospital, ENT Centre, Souillac Hospital and Cardiac Centre. Cases are either entered on Waiting List or a firm date is given through the Booked List system.

Additionally, there are three separate surgery/procedure Lists of Unfit Patients, Multi-stage Surgeries and Patients Requesting Postponement which are not accounted hereunder as their waiting times are beyond the control of their departments/specialties.

7.1 Overall

- 7.1.1 11,293 cases were either on waiting or booked lists comprising 5,070 cases for surgery, 1,758 for procedures and 4,465 for specialised radiological examinations. 5,958 cases on the waiting list comprising 4,559 for surgery, 1,365 for procedures and 34 for examinations. And regarding booked list, there were 511 for surgery, 393 for procedures and 4,431 for examinations.
- 7.1.2 Cases awaiting surgery/procedure/examinations have gone down by 1.4% in 2022. Cases awaiting surgery has gone down by 36.6%, procedures remaining the same as the previous year while examinations have increased by 165.3%.
- 7.1.3 Considering accumulated cases in 2020 – 2021 due to the pandemic, this is the second consecutive year where a decline in waiting and booked lists has taken place.
- 7.1.4 Waiting lists for surgery reckoned 3,973 cases in the Department of Ophthalmology depicting the massive 66.2% drop compared to the 6,604 cases of the previous year. The other specialties had less than 250 cases each with the highest of 241 cases in Cardiac Surgery. As for procedures, 861 patients were waiting for angiography/angioplasty, 360 for endoscopy and 144 for lithotripsy.
- 7.1.5 4,431 were on booked list for radiological examinations out of a total of 5,335 cases on this list, also consisting 511 cases for surgery and 393 for procedures.
- 7.1.6 3,085 cases were waiting for echography/ultrasound, 956 for CT-Scan, 334 for MRI and 90 for mammography.
- 7.1.7 Waiting time has gone down everywhere in 2022 with patients waiting for 9.5 weeks for surgery compared to 17.2 weeks in 2021, 7.8 weeks for procedures against 8.2 weeks and 3.7 weeks for examinations against 15.9 weeks in the previous year.
- 7.1.8 Highest waiting times as at 31 December 2022 were as follows: 29.4 weeks for Neurosurgery at Victoria Hospital, 26.0 weeks for overall ophthalmology service,

24.4 weeks for angiography at J Nehru Hospital and 18.9 weeks at Dr A G Jeetoo Hospital and 12.2 weeks for Paediatric Orthopaedics cases at SSRN Hospital among others.

Table 12: Evolution of Waiting and Booked Lists of Surgeries and Procedures - 2022

Specialty	Balance (as at 01 January 2022)	New patients	Cases Performed	Removed Cases	Balance (as at 31 December 2022)		
					Waiting List	Booked List	Total

7.2 Others

7.2.1 As at 31 December 2022, 391 cases were awaiting foreign teams/specialists consisting of 153 cases in Cardiac Surgery, 45 in ENT, 90 in Ophthalmology, 84 in Orthopaedics, 8 in Paediatric Surgery and 11 in Plastic Surgery.

7.2.2 1,097 patients were unfit for surgery in the Department of Ophthalmology, 48 in Cardiac Surgery and 89 for angiography.

7.2.3 Surgery has been delayed in 42 cases on request of patients.

Operating Theatres and Surgeries Carried Out

8.1 Usage of Operating Theatres

8.1.1 38 operating theatres were available as in 2022 comprising 32 theatres for planned surgeries/procedures and 6 dedicated for emergencies.

8.1.2 At SSRN Hospital, one extra session was scheduled on Mondays from 16.00hrs to 21.00hrs for Paediatric Orthopaedics cases only.

8.1.3 15,839 planned operating sessions were available but 3,070 sessions (19.4%) did not have any activity showing an increased use of theatres in 2022.

8.1.4 J Nehru Hospital has again accounted for the highest number of 744 unused sessions this year, again followed by 655 such sessions at Dr A G Jeetoo Hospital. Souillac Hospital has not used 403 sessions, 337 at Cardiac Centre, 212 at SSRN Hospital, 211 and 208 at ENT Centre and Flacq Hospital respectively while Victoria Hospital and S Bharati Eye Hospital had the least of 142 and 158 unused sessions.

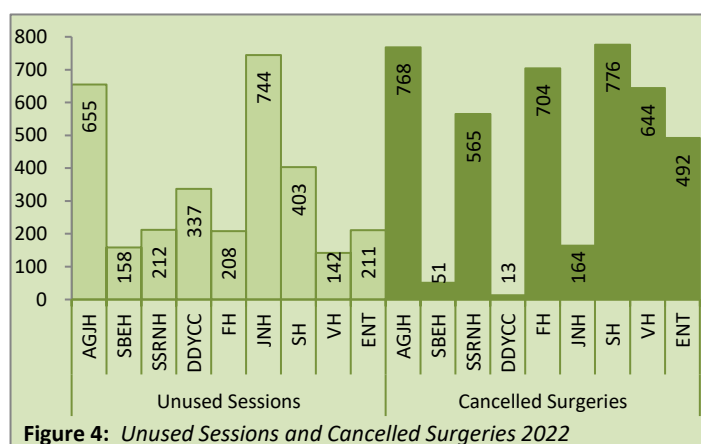

Figure 4: Unused Sessions and Cancelled Surgeries 2022

8.1.5 Patients were not available in 1,488 sessions (representing 48.5% of all cancelled sessions) while they were absent in another 190 sessions. 176 sessions had to be cancelled as patients were unfit and 136 sessions due to lack of equipment.

8.1.6 4,177 planned surgeries were cancelled which included 2,154 patients who did not turn up and 1,206 unfit ones. 191 surgeries had to be rescheduled including 132 at Flacq Hospital while 185 were cancelled due to lack of time.

8.1.7 Cancelled cases represented 12.9% of all scheduled surgeries and have gone down compared to 2021.

8.1.8 12,740 planned sessions were held during the day and 29 extra sessions in the evening at SSRN Hospital where 28,174 surgeries were performed.

8.1.9 Planned sessions for surgery and cases performed which had been going down since 2018 have increased by 16.7% and 27.8% respectively in 2022. However, for the five-year period of 2018 – 2022, planned sessions still indicate 0.8% drop annually and 5.4% for cases performed. Meanwhile, emergency surgeries have increased by 2.7% this year and 4.1% annually between 2018 and 2022.

8.2 Surgeries Performed

- 8.2.1 49,318 surgeries were performed in 27,156 sessions in 2022. They comprised 49,012 cases carried out by some 136 in-house surgeons during 26,968 sessions and 306 cases by foreign teams in 188 sessions.
- 8.2.2 28,198 planned surgeries were performed representing 57.2% of total surgeries performed against 21,120 emergencies. This year, planned surgeries have increased significantly by 27.9% and emergencies by 2.6% only. Planned surgeries have increased at all hospitals and in all specialties except Neurosurgery and Vascular Surgery which have experienced drops of 20.8% and 2.3% respectively.
- 8.2.3 Of the 21,120 emergency cases performed, 14,271 (67.6%) cases were conducted during normal working hours, 4,116 cases (19.5%) after normal working hours and the remaining 2,733 cases (12.9%) on weekends and public holidays.
- 8.2.4 Dr A G Jeetoo Hospital, J Nehru Hospital, Victoria Hospital and ENT Centre have conducted lesser planned surgeries than emergencies.
- 8.2.5 67 planned surgeries were carried out in 29 extra sessions in the Paediatric Orthopaedics Department at SSRN Hospital. Only this department at this hospital has been continuously resorting to extra sessions.

8.3 Surgeries performed by Hospital

- 8.3.1 Victoria Hospital has conducted the highest of 8,114 surgeries followed by 7,773 cases by S Bharati Eye Hospital, 7,679 at Dr A G Jeetoo Hospital, 5,320 at SSRN Hospital, 4,939 at Flacq Hospital, 4,486 at J Nehru Hospital, 2,897 at Souillac Hospital and 1,403 cases at Cardiac Centre. ENT Centre accounted for 6,707 cases including 5,916 minor local anaesthesia cases.
- 8.3.2 Surgeries have increased by 15.7% after consecutive drops in the last four years nearing the 50,000 performed cases in a normal year. Thus, surgeries have gone down by 1.5% on average every year between 2018 and 2022.

8.4 Surgeries Performed by Specialty

- 8.4.1 Maintaining the trend of previous years, General Surgery has carried out the highest number of 12,688 surgeries and obviously followed by 10,670 cases in Ophthalmology, 7,255 by Orthopaedics and 7,110 by Obstetrics and Gynaecology. Cardiac Surgery reckoned 1,091 cases, 868 for Neurosurgery, 576 for Vascular Surgery and 225 cases at Paediatric Surgery.
- 8.4.2 Since the last Renal Transplants carried out in 2017, 9 surgeries were performed in 2022 including 8 specific renal transplant cases.

8.5 Selected Surgeries

- 8.5.1 The Cardiac Centre has performed 974 open heart surgeries.
- 8.5.2 The Department of Neurosurgery has registered an increase for the sixth continuous year, being 14.7% this year and 10.4% annually for the last five years.
- 8.5.3 In the Department of Ophthalmology, 7,846 cataract, 516 vitrectomy and 23 cases of keratoplasty were performed.

Table 14: Surgeries Performed 2022

Specialty	Sessions	Surgeries	Average per session
Cardiac Surgery	1091	1091	1
Dentistry	50	53	1.1
ENT	3051	6,640	2.2
General Surgery	8,039	12,688	1.6
Neurosurgery	792	868	1.1
Obstetrics and Gynaecology	4,978	7,110	1.4
Ophthalmology	2,499	10,670	4.3
Oral Surgery	117	159	1.4
Orthopaedics	4,818	7,255	1.5
Paediatric Surgery	188	253	1.3
Plastic Surgery	593	1,458	2.5
Renal Transplant	9	9	1
Vascular Surgery	488	576	1.2
Other Specialties	443	488	Does not apply
TOTAL	27,156	49,318	

- 8.5.4 General surgeons at Regional Hospitals have performed 561 Arteriovenous Fistula and 920 lithotripsy cases, approaching the pre-pandemic targets.

- 8.5.5 Of the 6,640 cases performed in the specialty of ENT, only 847 cases required general anaesthesia.

8.6 Anaesthesia

- 8.6.1 51 anaesthetists were still in post as in 2022.
- 8.6.2 25,610 (51.9%) surgeries were performed under Local Anaesthesia, 14,545 (29.5%) under General Anaesthesia, 7,888 (16.0%) under Spinal Anaesthesia and 1,275 (2.6%) under other types of anaesthesia.
- 8.6.3 Although General Anaesthesia cases have increased from 13,337 in 2021 to 14,545 cases, they have in fact decreased percentage-wise, from 31.3% to 29.5%.
- 8.6.4 General Anaesthesia was required in 4,219 surgeries at Victoria Hospital followed by 2,727 cases at J Nehru Hospital, 2,481 at Dr A G Jeetoo Hospital, 1,718 cases at SSRN Hospital and 1,329 cases at Flacq Hospital. Although cases have increased at all regional hospitals, the order of resorting to this type of anaesthesia among hospitals has remained the same as above.

- 8.6.5 7,709 cases were carried out under Local Anaesthesia at S Bharati Eye Hospital followed by 5,916 at ENT Centre, 2,696 at Souillac Hospital, 2,536 at Victoria Hospital and 2,339 cases at Dr A G Jeetoo Hospital while the others have catered less than 1,800 cases each. The Cardiac Centre has resorted to Local Anaesthesia in 388 cases only.
- 8.6.6 Spinal anesthesia was required in 7,888 cases consisting of 2,442 cases at Dr A G Jeetoo Hospital, 2,342 cases at SSRN Hospital, 1,657 cases at Flacq Hospital, 816 at Victoria Hospital and 631 at J Nehru Hospital.
- 8.6.7 The Department of General Surgery resorted to General Anaesthesia in 5,275 surgeries followed by 3,184 cases in Obstetrics and Gynaecology and 2,472 in Orthopaedics while the remaining specialties reckoned less than 1,000 cases individually.
- 8.6.8 The Department of Ophthalmology resorted to local anaesthesia in 10,405 cases followed by 5,793 cases in ENT, 4,651 cases in General Surgery, 2,345 cases in Orthopaedics and 942 in Plastic Surgery while the remaining specialties have reckoned less than 500 cases each.
- 8.6.9 Flacq Hospital has resorted to Spinal Anaesthesia more than General or Local Anaesthesia. S Bharati Eye Hospital has resorted to General Anaesthesia in 64 cases and the remaining 7,709 cases were conducted under Local Anaesthesia.
- 8.6.10 Anaesthetists have catered to 98.6% of total surgeries performed.
- 8.6.11 The Departments of Cardiac Surgery at Cardiac Centre, Dentistry, ENT, Ophthalmology and Oral Surgery have exclusively used local and general anaesthesia while the remaining ones have also used other types of anaesthesia.

Foreign Teams

- 9.1.1 With waiving on air travel restriction, 17 foreign teams have carried out 21 visits in the country in 2022 and have covered almost all of the main specialties where their expertise is often required.
- 9.1.2 The visits took place all over the year and culminated in 136 days of stay.
- 9.1.3 30 outpatient clinic sessions were held and 810 cases were seen. It is the highest number of cases seen in the last five years.
- 9.1.4 306 surgeries were performed by visiting specialists in 188 operating sessions.
- In Cardiac Surgery, 2 visits were effected, no outpatient clinic was held but 31 operating sessions were planned and an equal number of surgeries were performed.
 - In ENT, 2 visits were effected, 1 outpatient clinic was carried out, 6 operating sessions were held where 23 cases were performed.
 - In General Surgery, 2 operating sessions were held in one visit and 3 cases were operated.
 - In Ophthalmology, 22 outpatient clinic sessions were carried out during 9 visits where 572 patients were seen, 88 operation sessions were scheduled and 173 surgeries were carried out.
 - In Orthopaedics, 5 outpatient clinic sessions were carried out during 3 visits where 169 patients were seen, 27 operations were planned and 34 cases operated.
 - In Paediatrics Surgery, 1 outpatient session was conducted during the only visit and 26 patients were seen. Surgeries were conducted concurrently by two teams in 20 operating sessions where 28 surgeries were performed.
 - In Plastic Surgery, during the sole visit, 26 patients were seen in one outpatient session while 9 cases were performed in an equal number of sessions.
 - In Renal Transplant, 5 cases were performed in 5 sessions involving both donors and patients.

Inpatient Service

Inpatient activity returned back to normal and beds were reinstated except that the ENT Isolation Centre and Isolation Wards at regional hospitals were maintained in place.

10.1 Bed availability

10.1.1 Public hospitals operated with an average of 3,594 beds in 162 wards during the year while 3,661 beds were available on 31 December 2022.

10.1.2 Available beds on 31 December 2022 included 3,225 adult general beds, 107 children beds and 121 cots, 130 for intensive care including 29 for neonates, 43 for labour wards, 21 incubators and 14 beds for detainees.

Table 15: Inpatient activity 2022

Hospital	Ward	Average Daily Available Beds	Admissions	Percentage Occupancy
AGJH	29	586	31,959	75.8
BSMHCC	26	596	2,925	81.9
SBEH	2	66	7,614	86.6
SSRNH	19	498	26,469	64.2
DDYCC	3	60	4,114	67.6
PDH	4	65	345	40.9
FH	13	327	22,762	67.3
JNH	17	398	24,192	72.4
MH	3	43	2,515	50.2
SH	2	61	5,370	75.7
VH	39	706	31,909	70.6
ENT	2	33	2,152	63.0
NCC	2	56	2,272	50.3
ENT Iso	1	99	1,615	24.4
TOTAL	162	3,594	166,213	70.3

10.2 Admissions

10.2.1 166,213 admissions were registered in 2022 depicting 11.4% increase and approaching the normal limit. Dr A G Jeetoo Hospital reckoned the highest of 31,959 admissions closely followed by Victoria Hospital with 31,909 admissions and the other regional hospitals recording between 22,000 to 27,000 admissions. Then followed S Bharati Eye Hospital which had admitted 7,614 cases followed by 5,370 at Souillac Hospital, 4,114 at Cardiac Centre while the remaining ones catered for between 1,600 to 3,000 admissions each.

10.2.2 This was the first time that the Cardiac Centre had admitted more than 4,000 cases in a year.

10.2.3 The Department of General Medicine reckoned 40,172 admissions followed by 25,846 at General Surgery, 17,983 at Obstetrics and Gynaecology, 14,231 at Cardiology, 11,238 at Orthopaedics, 10,547 at Paediatrics and 10,365 at Ophthalmology while the remaining specialties have catered for less than 7,000 admissions.

10.2.4 3,582 admissions were recorded at isolation wards of regional hospitals and 1,615 at the ENT Isolation Centre. These admissions have gone down by 24.4% in 2022.

10.3 Percentage Bed Occupancy

- 10.3.1 Bed occupancy has increased to 70.3% this year with S Bharati Eye Hospital reckoning for the first time the highest of 86.6% occupancy followed by Brown Sequard Mental Health Care Centre with 81.9% while Poudre D'Or Hospital recorded the least of 40.9% occupancy. The ENT Isolation Centre recorded 24.4% bed occupancy.
- 10.3.2 The Department of Cardiac Surgery at Cardiac Centre has required 106.9% bed occupancy and the Ophthalmology services at Souillac Hospital with 119.8% were the highest occupancy rates among specialties. Bed occupancy of the Oncology Department was met with the opening of the New Cancer Hospital. Other regular specialties have filled more than 60% of their beds except for the Department of Paediatrics which has been registering less than 50% of bed occupancy since years.

10.4 Length of Stay

- 10.4.1 Length of Stay which was steadily going up and had reached 6.1 days in 2021, dropped to 5.7 days this year.
- 10.4.2 Brown Sequard Mental Health Care Centre admitted long-stay patients for 353.5 days on average and 23.3 days for the other ones followed by 25.9 days at Poudre D'Or Hospital, 5.8 days at Victoria Hospital, 5.1 days at Dr A G Jeetoo Hospital and not more than 5 days at the other ones. The ENT Isolation Centre has however admitted patients for some 5.5 days.
- 10.4.3 Except for the obvious intensive care wards which reckoned longer days of stay, only the Psychiatric Ward at Mahebourg Hospital and Ward F11 of Victoria Hospital had cases admitted cases for 18.4 and 15.2 days respectively.
- 10.4.4 13,458 patients (8.6%) have stayed for 1 day only followed by 98,271 patients (63.1%) who have stayed between 2 to 5 days, another 28,796 patients (18.5%) have stayed for 6 to 10 days, 13,072 patients (8.4%) have stayed up to one month and 3,158 patients (1.4%) have stayed for more than one month. Out of 660 patients (0.4%) who have stayed for more than three months, 555 were admitted at Brown Sequard Mental Health Care Centre of which 358 stayed for the whole year.
- 10.4.5 Beds remained vacant for an average of 2.4 days in between discharges to admissions with the highest interval of 37.4 days at Poudre D'Or Hospital.

10.5 Fatality Ratio

- 10.5.1 6,127 inpatient deaths occurred at public hospitals indicating 4.7% decrease compared to 2021. Fatality Ratio has also gone down to 3.7% against 4.4% in the previous year.

10.5.2 The ENT Isolation Centre recorded the highest Fatality Ratio of 15.9% followed by the Cancer Centre with 6.2%, 5.1% at Victoria Hospital while the remaining Regional Hospitals together with Poudre D’Or Hospital reckoned between 3.0 – 4.5% of deaths.

10.5.3 Causes of death are available at paragraph 15 hereunder.

10.6 Morbidity

10.6.1 30,706 admissions were recorded among patients of 70+ years of age followed by 29,246 in the 60 – 69 age group and 24,330 in the 50 – 59 age group. 75,216 admissions were among males and 80,539 among females.

10.6.2 Admissions of females between the ages of 12 to 39 were higher than males. The latter exceeded females in the 40 to 69 years age group and then vice-versa after 70 years of age.

10.6.3 Diseases of the Circulatory System was the first cause in 20,373 admissions followed by 13,478 for injuries, 12,855 for respiratory diseases, 11,949 for genitourinary system, 11,481 for obstetrics problems and 10,673 for digestive problems. Additionally, 7,786 cases were admitted for ophthalmology problems and 6,874 cases for mental disorders. There were also 13,059 admissions with ill-defined conditions.

Deliveries and Births

11.1 Deliveries

Deliveries are mainly carried out at Regional Hospitals while the two District Hospitals undertake less than 10 normal deliveries in a year and Dr Yves Cantin Community Hospital carries out deliveries once in a while. As the ENT Isolation Centre was still functional in 2022, 25 deliveries were carried out on COVID-19 positive patients.

11.1.1 6,957 deliveries were carried out in public hospitals in 2022 consisting of 3,067 (44.1%) normal ones, 3,778 (54.3%) caesarean sections, 102 (1.5%) forceps and 10 (0.1%) breech ones.

11.1.2 Deliveries consisted of 6,879 (98.9%) single, 72 twin and 6 triplet ones.

11.1.3 6,972 live births and 69 stillbirths occurred at hospitals. Dr A G Jeetoo Hospital reckoned the highest number of 20 stillbirths but SSRN Hospital recorded the highest of 1.2% of stillbirths.

11.1.4 4 maternal deaths took place including 1 indirect cause of death, out of which 3 were referred to Police Medical Officer.

11.1.5 21 of the mothers were less than 15 years old, 774 were between 15 to 19 years, 3,787 were between 20 to 29 years, 2,185 were between 30 to 39 years, 180 were between 40 to 44 years and 10 were above 45 years.

11.1.6 Specialists have conducted 56.6% of deliveries followed by 41.7% by midwives and 1.7% by MHOs.

11.1.7 Deliveries have decreased by 11.4% in 2022 and 5.1% on average every year for period 2018 to 2022. Caesarean sections accounted for 54.3% of total deliveries, the highest ever achieved. J Nehru Hospital has reckoned 61.0% of caesarean sections followed by 60.0% at Flacq Hospital, 57.2% at Victoria Hospital, 56.0% at ENT Isolation Centre, 55.0% at SSRN Hospital and 46.2% at Dr AG Jeetoo Hospital.

11.1.8 Hospitals have catered to another 85 additional deliveries which occurred outside of its premises consisting of 72 live and 13 stillbirths. All of them were normal deliveries.

11.2 Births

11.2.1 7,041 births took place in public hospitals in 2022 consisting of 6,972 (99.0%) live births, 33 fresh and 36 macerated stillbirths.

11.2.2 The 92 neonatal deaths have gone down by 10.7% in 2022 and accounted for 1.3% of total live births both in 2021 and 2022. Perinatal deaths, 123 in number, have gone down by 25.9% in 2022 and therefore accounted for 1.7% of all live births in 2022 compared to 2.1% in 2021. With 69 cases, stillbirths also have gone down by 25.8% in 2022 and accounted for 1.0% of all live births in 2022 compared to 1.2% in 2021.

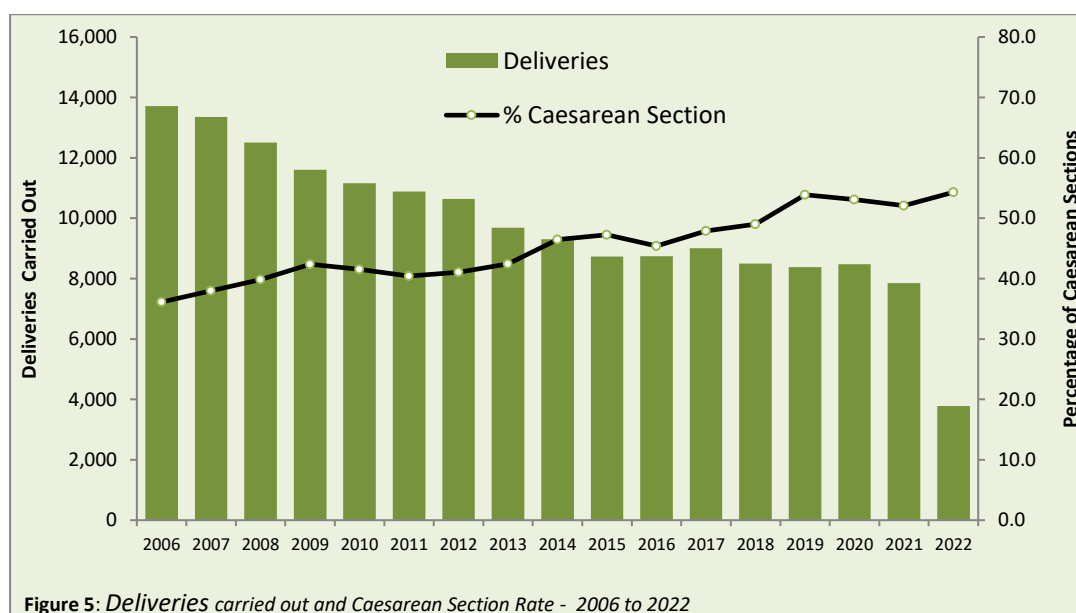

11.2.3 1,618 cases of low birth weight and 672 cases of prematurity among newborns were encountered. Low birth weight which was at 21.3% of total live births in 2021 has rose to 23.2% in 2022 and prematurity which was 8.9% in 2021 increased to 9.6% in 2022.

11.3 Caesarean sections

11.3.1 3,778 caesarean sections were carried out representing 54.3% of all deliveries.

11.3.2 Some 26 Obstetricians have carried out an average of 145 caesarean sections but which ranged between 105 and 203 cases at individual level.

11.3.3 All regional hospitals and the ENT Isolation Centre have performed from 55% to 61% of caesarean sections on total deliveries, except for 46.2% at Dr A G Jeetoo Hospital.

11.4 Others

11.4.1 9 teenagers of less than 15 years have undergone caesarean sections followed by 341 who were aged 15 to 19 years.

- 11.4.2 The percentage of caesarean sections increased with age, culminating in 80.0% of caesarean sections among women who were 45 years and older.
- 11.4.3 The eldest woman who has delivered was 47 years old.
- 11.4.4 101 women suffered from pre-eclamptic toxæmia indicating 38.4% increase this year.

Procedures, Examinations and Other Tests

12.1 Pathological Tests

- 12.1.1 The National Cancer Centre started offering laboratory services in the departments of Biochemistry and Haematology as from December 2021 while the ENT Centre restarted Biochemistry tests as from January 2022. Furthermore, a new Molecular Biology test was introduced at the Central Health Laboratory, Victoria Hospital in 2022.
- 12.1.2 7,357,486 blood samples were received at the Laboratory Services and consequently 15,086,869 tests were carried out. Specimens have increased by 7.4% and tests by 14.4% in 2022 after successive drops in 2020 and 2021.
- 12.1.3 Tests have increased at all public health institutions except Plaine Verte Mediclinic and Dr Yves Cantin Community Hospital.
- 12.1.4 As in the previous years, the Central Laboratory at Victoria Hospital has carried out the highest number of tests: 40.8% (6,152,301) of all tests were carried out followed by 16.6% at SSRN Hospital, 14.7% at Dr A G Jeetoo Hospital, 11.1% at J Nehru Hospital and 10.9% at Flacq Hospital among the Regional Hospitals. The National Cancer Centre has covered 1.5% of all tests while the remaining facilities have performed less than 1.5% of tests each.
- 12.1.5 Tests have increased at all laboratory sections in 2022 except at the Virology Department which has registered a drop of 54.0% after increases in the last five years. The Department of Cytology has registered an increase of 135.6% followed by 97.0% at the Parasitology Department, 21.5% at both the Bacteriology and Biochemistry Departments, 10.8% at Haematology, 9.9% at the Blood Transfusion Service and 7.5% at Histology.
- 12.1.6 Ratio of specimens to tests has maintained the same trend as compared to previous years with a ratio of 1:9 at the Histology Department followed by 1:6 at Bacteriology Department, 1:5 at Blood Transfusion Service, 1:4 at Haematology, 1:3 at Molecular Biology 1:2 at the Virology and 1:1 in the remaining Departments. Overall ratio has remained at 1:2 as in the previous years.
- 12.1.7 As usual, the Biochemistry Section has been processing the highest number of tests every year accounting for 51.5% of all tests followed by 30.8% at the Haematology Section, 7.5% at the Blood Transfusion Service, 4.0% at the Bacteriology Section and less than 3% at each of the other sections.
- 12.1.8 For period 2018 – 2022, tests have increased by 1.5% on average every year.

12.2 Radiological examinations

- 12.2.1 767,692 radiological examinations were carried out indicating *14.5%* increase in 2022. These examinations have been continuously increasing over the years except for the last three years.
- 12.2.2 Dr A G Jeetoo Hospital accounted for the highest of *27.4%* (210,265) of all x-rays performed and the least of *11.3%* (86,679) at J Nehru Hospital among regional hospitals. The other facilities have performed less than 5,000 cases in the year.
- 12.2.3 Among the lowest activity level, Belvedere Mediclinic has carried out 116 examinations, 229 at Poudre D'Or Hospital and 362 at Plaine Verte Mediclinic.
- 12.2.4 Activity has increased at all health facilities except for drop of *50.8%* at Poudre D'Or Hospital, *49.4%* at Plaine Verte Mediclinic and *12.5%* at Triolet Mediclinic.
- 12.2.5 The Accident and Emergency Department accounted for *69.2%* of all x-rays done, representing *82.6%* of total examinations at Dr A G Jeetoo Hospital followed by *77.0%* at Flacq Hospital, *68.5%* at Victoria Hospital, *63.3%* at SSRN Hospital *44.9%* at J Nehru Hospital.
- 12.2.6 The most common examinations carried out remained the same: 273,580 x-rays on extremities, 181,584 of the chest, 81,101 on the spine, 68,241 on the skull and 64,026 on the abdomen.
- 12.2.7 1,349 cases of angiography were carried out and 46,400 cases of echography, 35,391 CT-Scans and 5,435 MRIs. Angiographies have gone down by *23.2%* while the others have increased by *3.3%*, *29.1%* and *32.4%* respectively.

12.3 Endoscopy

- 12.3.1 Available at Regional Hospitals, this Service has conducted 10,405 examinations. Dr A G Jeetoo Hospital has catered for 5,529 (*53.1%*) cases followed by 2,025 cases at SSRN Hospital, 1,053 at J Nehru Hospital, 973 at Flacq Hospital and 825 cases at Victoria Hospital.
- 12.3.2 Examinations consisted of 6,697 cases of gastroscopy cases followed by 3,271 colonoscopy cases, 414 Endoscopic Retrograde Cholangiopancreatography (ERCP) cases and 15 cases of Sigmoidoscopy among others.
- 12.3.3 Activity and examination type have both gone up at all institutions with *41.5%* overall increase in activity including *177.2%* rise at Flacq Hospital. For the last five years, activity has increased by *13.1%* on average every year.

12.4 Chemotherapy and Radiation

- 12.4.1 Chemotherapy service was available at all Regional Hospitals except Flacq Hospital while Radiation Therapy was available at Victoria Hospital only.
- 12.4.2 14,529 sessions of Chemotherapy were carried out consisting of 12,617 sessions at Victoria Hospital, 865 at SSRN Hospital, 811 at J Nehru Hospital and 236 at Dr A G Jeetoo Hospital.
- 12.4.3 Chemotherapy sessions have gone down by 0.8% in 2022 with 59.5% drop at Dr A G Jeetoo Hospital, 32.1% at SSRN Hospital and 31.9% at J Nehru Hospital while Victoria Hospital has registered an increase of 8.8%.
- 12.4.4 For period 2018 to 2022, sessions have increased by 4.1% annually on average.
- 12.4.5 At the Radiation Therapy services, 4,039 attendances were registered on the Equinox machine, 7,678 on the Elite 80 and 10,293 on the Linear Accelerator.
- 12.4.6 Activity has gone up by 2.7% in 2022 including 81.9% increase on the Linear Accelerator but with drops of 54.9% and 14.3% on the Equinox and Elite-80 machines respectively.

13 Other Procedures, Examinations and Tests**13.1 Cardiac procedures**

- 13.1.1 Cardiac procedures were carried out at Dr A G Jeetoo Hospital, Victoria Hospital and the Cardiac Centre.
- 13.1.2 5,706 cases of angiography were carried out this year indicating an increase of 21.0%. Cardiac Centre has conducted 2,900 cases followed by 1,863 cases at Victoria Hospital and 943 cases at Dr A G Jeetoo Hospital.
- 13.1.3 This year, angiography cases have gone up by 49.3% at the Cardiac Centre and 9.6% at Victoria Hospital while Dr A G Jeetoo Hospital recorded 12.2% drop. For period 2018 to 2022, angiographies have increased by 6.6% on average every year.
- 13.1.4 Additionally, 36 other cardiac procedures were carried out at the Cardiac Centre.
- 13.2 CT-Renal Angiography** was carried out by radiologists on patients suffering from renal problems at J Nehru Hospital only. 18 cases were performed depicting normal activity this year.

13.3 Electrocardiogram (ECG)

13.3.1 241,716 electrocardiograms were carried out at public hospitals excluding cases performed in the Departments of Cardiology. They indicate an increase of 4.6% in 2022 affecting all hospitals except for 16.5% drop at J Nehru Hospital.

13.4 Electroconvulsive Therapy (ECT) and Electroencephalogram (EEG)

13.4.1 ECT and EEG Services were provided at Brown Sequard Mental Health Care Centre only.

13.4.2 ECT was conducted on 227 patients indicating 6.6% drop in 2022 and 4.3% annually for the last five years.

13.4.3 The 1,625 EEGs carried out indicated normal activity.

13.5 Laser treatment

13.5.1 Laser treatment for eye problems was available at Dr A G Jeetoo Hospital, SSRN Hospital, S Bharati Eye Hospital, Souillac Hospital and Belvedere Mediclinic. All health facilities provided Argon laser treatment. Yag laser treatment was however routinely available at S Bharati Eye Hospital but also included Souillac Hospital as from April 2022.

13.5.2 4,712 sessions were carried out comprising 3,427 sessions of Argon and 1,285 Yag sessions. S Bharati Eye Hospital has alone conducted 3,135 cases of Argon and 1,212 cases of Yag laser treatment.

13.5.3 Activity was minimal at the remaining hospitals: 201 cases at Souillac Hospital, 50 at Dr A G Jeetoo Hospital, 31 at SSRN Hospital and 10 at Belvedere Mediclinic.

13.5.4 Activity has increased by 51.4% in 2022 depicting a return towards normalcy.

13.6 Lithotripsy

13.6.1 920 Lithotripsy cases were carried out by general surgeons consisting of 351 cases at J Nehru Hospital, 304 at SSRN Hospital and 265 cases at Victoria Hospital. Following 36.4% drop in 2021, the service has increased by 40.2% this year with significant increases at J Nehru Hospital in these two years.

13.6.2 Waiting list has grown from 167 cases in 2020 to 187 in 2021 and then 148 cases this year. However, waiting time has dropped from 10.6 weeks in 2021 to 9.3 weeks in 2022.

13.7 Medical Fitness Examinations

- 13.7.1 Out of 287 requests received for medical fitness of Seafarers, only 59 (20.6%) candidates attended hospitals for examination.
- 13.7.2 3,743 examinations were carried out for officers who joined the public service in addition to 421 other medical fitness examinations.
- 13.7.3 A total of 4,223 medical examinations were carried out depicting 38.2% increase in activity.

13.8 Nuclear Medicine

- 13.8.1 The Service is available at J Nehru Hospital only. 1,384 visits were registered indicating 5.9% growth in 2022 and 7.1% on average every year between 2018 to 2022.
- 13.8.2 The most common examinations have remained the same over the years, including 730 Bone Scans, 193 Thyroid Scans, 129 Heart Scans, 125 Renal Scans and less than 40 cases for each of the other tests.

13.9 Spirometry (pulmonary function test) is performed exclusively at the Chest Clinic. 275 tests were performed depicting 161.9% increase in 2022 and 12.4% annually every year for period 2018 to 2022.

- 13.9.1 This year has seen the highest number of tests carried out in more than 10 years.

13.10 Stress Tests were available at Regional Hospitals and the Cardiac Centre. After having been going down since 2017, cases have doubled from 2,381 in 2021 to 4,912 this year indicating a rise of 106.3%.

- 13.10.1 Tests comprised 1,242 cases at SSRN Hospital followed by 1,109 at Victoria Hospital, 1,087 at Dr A G Jeetoo Hospital, 954 at J Nehru Hospital and 511 at Flacq Hospital. All hospitals have registered increases with significant ones at SSRN Hospital and Victoria Hospital.

- 13.10.2 For period 2018 to 2022, stress tests indicated an average annual increase of 5.4%.

13.11 Tubal ligation

- 13.11.1 Gynaecologists at Regional Hospitals have carried out 507 tubal ligations with Victoria Hospital as usual performing the highest of 168 cases and J Nehru Hospital the least of 71 cases. 280 women, i.e., 55.2%, were in the 30 – 39 age group and 54 were between 40 – 44 years.

Surveillance of Some Conditions of Health

Increase was noted in all diseases under surveillance with the waiving of two years of social distancing.

14.1 Conjunctivitis

14.1.1 26,126 cases of conjunctivitis were reported at public health institutions including 14,188 (54.3%) cases at primary health care centres.

14.1.2 Cases were highest in August (2,887) and November (2,935) compared to 2,177 for the year and with lowest attendance of 1,211 cases in February.

14.1.3 Cases have increased by 36.6% across all health regions this year. An average of 72 cases was seen daily compared to 52 in 2021.

14.2 Gastroenteritis

14.2.1 92,419 cases of gastroenteritis were recorded at public health institutions including 56,451 (61.1%) cases at primary health centres. Cases have increased by 71.3% encountering some 253 cases daily.

14.2.2 Cases were the highest in October (9,349) and November (9,513) while the remaining months had an average of 7,356 cases. Children under the age of 12 years represented 28.1% of total attendance.

14.2.3 2,791 patients were admitted representing 3.0% of total cases treated at hospitals. Children under 12 years of age represented 33.4% of total admissions.

14.3 Upper Respiratory Tract Infection (URTI)

14.3.1 658,215 cases of influenza-like-illnesses (ILIs) attended public health institutions with 336,712 (51.2%) cases registered at primary health care centres. Cases have increased by 138.9% in 2022.

14.3.2 Attendances were the highest in February (66,758), June (69,984) and July (83,490) while the lowest of 22,889 cases were recorded in January and 35,524 cases in April.

14.3.3 An average of 1,803 cases was registered per day compared to 755 cases in 2021.

14.3.4 3,673 admissions were encountered with 10 cases on average daily compared to 6 cases last year. These represented 1.1% of all cases treated at hospitals compared to 0.8% in 2021.

14.4 Type I Diabetes Mellitus

14.4.1 958 patients comprising 438 males (45.7%) and 520 females (54.3%) were following treatment for Type I diabetes mellitus at public hospitals in 2022 including 1 patient who passed away during the year.

14.4.2 There were 77 children under 15 years of age including 41 girls followed by 112 adolescents of less than 20 years and 769 adults were aged 20 years and above including 412 females.

14.4.3 345 patients (36.0%) were following treatment at Victoria Hospital in 2022 followed by 218 (22.8%) at Dr A G Jeetoo Hospital, 150 (15.7%) at SSRN Hospital, 130 (13.6%) at Flacq Hospital and 115 (12.0%) at J Nehru Hospital. 66 patients were following treatment at more than one public health institution.

14.4.4 28 new cases were enumerated this year comprising 11 males and 17 females. They consisted of 7 children of less than 15 years, 5 adolescents of less than 20 years and 16 adults as from 20 years of age. 12 patients (42.9%) were diagnosed at Dr A G Jeetoo Hospital followed by 9 (32.1%) at Victoria Hospital and between 2 - 3 cases at the other regional hospitals.

Figure 7: Type I DM cases

14.5 Gestational Diabetes Mellitus

14.5.1 1,053 women were suffering from diabetes mellitus during their pregnancy in 2022 showing a drop of 3.6% compared to the previous year.

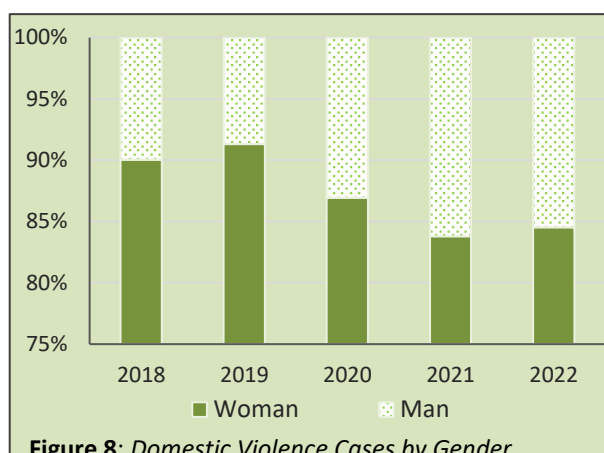

14.5.2 46 patients (4.4%) were in the 15 - 19 age group, 467 women (44.3%) were in the 20 - 29 age group, 479 (45.5%) in the 30 - 39 age group and 61 (5.8%) were 40 years and above.

14.5.3 361 new cases (34.3%) followed treatment at Dr A G Jeetoo Hospital followed by 248 (23.6%) at SSRN Hospital, 157 (14.9%) at J Nehru Hospital, 148 (14.1%) at Victoria Hospital and 139 (13.2%) at Flacq Hospital.

14.5.4 With drops registered consecutively in the last three years, an annual drop of 2.6% is noted for period 2018 to 2022.

14.6 Domestic Violence

14.6.1 859 cases of domestic violence were registered at public hospitals in 2022 comprising 726 women (84.5%) and 133 men. 246 cases (28.6%) were registered at Dr A G Jeetoo Hospital followed by 188 (21.9%) at SSRN Hospital, 150 cases (17.5%) at Victoria Hospital, 88 (10.2%) at Flacq Hospital, 80 (9.3%) at J Nehru, 62 (7.2%) at Souillac Hospital and 45 (5.2%) at Mahebourg Hospital.

14.6.2 Cases have gone down for the fourth consecutive year, reckoning 2.6% drop this year with 1.8% decrease in women and 7.0% in men. Also, 13.5% average drop is noted annually for period 2018 to 2022 but with 4.6% increase among men and 16.0% drop among women.

14.6.3 Cases have otherwise increased by some 30% at SSRN Hospital almost equally among both sexes and 45.0% in men at Victoria Hospital.

14.7 Child Abuse

14.7.1 36 cases of abuse against children of less than 18 years were registered in 2022. This year also, SSRN Hospital has registered the highest of 9 cases followed by 7 cases at Souillac Hospital and 6 cases at Flacq Hospital with the others reckoning less than 5 cases each.

14.7.2 Total cases have gone down for the fourth consecutive year with 35.7% drop this year and an average annual decrease of 21.2% between 2018 and 2022.

14.8 Scabies

14.8.1 1,380 cases were registered at all public health institutions indicating an increase of 21.8% this year following drops in the previous years.

14.8.2 Highest number of 353 cases (25.6%) was registered in Health Region of Victoria Hospital followed by 348 cases (25.2%) in the Health Region of Dr A G Jeetoo Hospital, 318 cases (23.0%) in the Health Region of J Nehru Hospital, 234 cases (17.0%) at the SSRN Hospital Health Region and 127 cases (9.2%) at the Health Region of Flacq Hospital.

14.8.3 Regarding hospitals, Victoria Hospital has once again registered the highest number of 177 cases in 2022 followed by 103 cases at Dr A G Jeetoo Hospital, 102 cases at

J Nehru Hospital, 82 at SSRN Hospital, 62 cases at Dr Y Cantin Community Hospital, 59 cases at Mahebourg Hospital, 57 cases at Souillac Hospital, 52 cases at Flacq Hospital and 18 cases at Long Mountain Hospital

14.8.4 Concerning primary health care centres, the highest of 91 cases was registered at Bambous AHC followed by 79 cases at Goodlands Mediclinic, 44 cases at Beau Bassin AHC, 42 cases at Floreal Mediclinic and 35 cases at Belvedere Mediclinic among others.

14.8.5 11 Health Centres have registered less than 10 cases each including Forest Side and Ollier CHC which did not record any case.

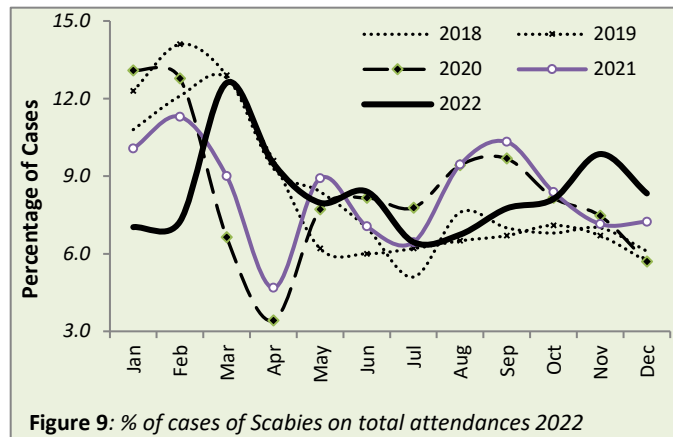

Figure 9: % of cases of Scabies on total attendances 2022

14.8.6 Cases were the highest in March, April and November while drops were noted in January, July and August.

14.8.7 Following drops in the last ten years, cases have increased by 21.8% this year but still indicate an average annual decrease of 11.3% between 2018 and 2022.

14.9 Foreigners attending for care and treatment

Foreigners were required to bear the cost of inpatient services at public hospitals except for citizens of Comoros Island.

14.9.1 1,004 foreigners attended public hospitals in 2022 including 31 Comoreans. They comprised 11 patients referred for treatment and 993 travelers and tourists.

14.9.2 Additionally, 120 patients were referred from Rodrigues and 1 from Agalega for further treatment. Another 5 Rodriguans and 1 Agalegan attended public health institutions while on visit in the country.

14.9.3 Of the 966 travellers, 562 were from Europe, 187 from Africa and 33 from India among others.

14.9.4 Dr Yves Cantin Community Hospital has registered the highest of 227 travelers followed by 160 at Dr A G Jeetoo Hospital, 120 at J Nehru Hospital, 114 at Victoria Hospital, 111 at Souillac Hospital and 105 at SSRN Hospital.

14.9.5 Although attendance has increased by 55.0% this year compared to 2021, it has however yet to reach the pre-pandemic period.

14.10 New patients of Brown Sequard Mental Health Care Centre

- 14.10.1 1,631 new psychiatry-related patients were seen by specialists at Brown Sequard Mental Health Care Centre which was almost as in 2021.
- 14.10.2 Mental disorders due to use of psychoactive substances remained the most frequent condition encountered with 325 cases (19.9%) but was closely followed by 317 cases (19.4%) of mood affective disorders, 268 cases (16.4%) of neurotic stress related disorders and 151 cases (9.3%) of schizophrenic and related disorders. Although the order of the diseases has remained the same, mental diseases due to use of psychoactive substances has gone down significantly in 2022.
- 14.10.3 New cases of stress-related disorders have increased significantly by 22.9% and lesser in some other disease groups. Cases of alcoholism have gone down as usual.
- 14.10.4 Use of psychoactive substances was found to be the highest in the 20 – 29 and 30 – 39 age groups (188 and 93 cases respectively) and also being the highest compared to the other disease groups.

14.11 Admissions in public hospitals due to consumption of drugs

- 14.11.1 1,001 admissions related to consumption of drugs were recorded in public hospitals in 2022 indicating 9.5% increase.
- 14.11.2 Brown Sequard Mental Health Care Centre reckoned 38.9% of all admissions followed by 25.2% at Dr A G Jeetoo Hospital, 19.5% at SSRN Hospital, 8.4% at J Nehru Hospital and 4.0% at Victoria Hospital and Flacq Hospital. Admissions have gone down significantly at Brown Sequard Mental Health Care Centre but have consequently increased at Dr A G Jeetoo Hospital and SSRN Hospital.
- 14.11.3 Admissions among males have gone down and therefore represented 89.7% of total admissions. This also implies admissions among females have increased in 2021 and 2022 with 74.6% rise this year.
- 14.11.4 6 patients were between 10 to 14 years of age, 53 were between 15 to 19 years, 434 between 20 to 29 years, 255 between 30 to 39 years, 146 between 40 to 49 and 108 being 50 years and over. Cases in the above 50 age group have gone up from 37 in 2021 to 107 in 2022.
- 14.11.5 507 patients were admitted for consumption of synthetic drugs followed by 307 for opiates, 60 for cannabis, 2 for cocaine and 115 for other mixed and unspecified drugs. Consumption of opiates and cannabis has increased this year.

14.11.6 In addition, hospitals have reported 7 cases of consumption of medicinal products which indicate a consequent drop as compared to the previous years.

14.12 Amputations

14.12.1 746 amputations were carried out in public hospitals in 2022 excluding 27 traumatic ones. Non-traumatic amputations comprised 458 (61.4%) new cases and 288 (38.6%) re-amputations. This year, first-time amputations have increased by 14.8%, re-amputations by 11.2% and total amputations by 13.4%.

14.12.2 Of the 458 new amputees, 329 were male and 129 were female patients. Of the new patients, 90.4% (414) were suffering from diabetes comprising 296 (71.5%) males and 118 females.

Table 16: Non-traumatic amputations

	2018	2019	2020	2021	2022
New amputees	451	467	510	399	458
Re-amputations	330	329	373	259	288
Total	781	796	883	658	746
% change of new amputees	13.3	3.3	9.2	-25.5	14.8
New amputees with diabetes mellitus	394	420	446	348	414

14.12.3 Males represented 73.6% of all amputations performed. However, proportions of females against males, with and without diabetes, have both increased this year.

14.12.4 Out of 414 new patients suffering from diabetes, 289 males and 114 females underwent lower limb amputation while 7 males and 4 females had an upper limb amputation.

14.12.5 New cases included 33 male and 11 female patients who did not suffer from diabetes. Of these, 31 male and 7 female patients underwent a lower limb amputation.

14.12.6 Of the 271 re-amputations performed on diabetic patients, 60.1% underwent a second amputation, 27.7% for a third one and 12.2% had four or more episodes of surgery. Regarding the 17 non-diabetic cases, 12 have undergone a second amputation, 3 a third one and 2 a fourth amputation.

14.12.7 Below-knee amputation was carried out on 69 patients followed by above-knee amputation on 9 of them. 171 above-knee amputations were performed including 93 patients who were amputated for the first time. Were also included 7 male and 2 female patients who have undergone above-knee amputation of both feet.

14.12.8 Non-traumatic amputations have increased by 13.4% in 2022 and by 1.8% on average every year from 2018 to 2022.

14.13 New Cases of Chest Clinic, Port Louis

- 14.13.1 618 new cases were encountered at the Chest Clinic comprising 116 cases of tuberculosis, 6 carcinoma cases, 319 cases of respiratory diseases, 136 cases of ill-defined chest-related signs and symptoms and 41 other unrelated chest diseases.
- 14.13.2 115 pulmonary and 1 extra-pulmonary new cases of tuberculosis were recorded but no HIV and relapsed cases were encountered.
- 14.13.3 Out of 319 cases of respiratory diseases, there were 165 cases of bronchial asthma, 52 cases of chronic obstructive pulmonary disease, 43 cases of bronchitis and 35 cases of pneumonia and chest infection among others.
- 14.13.4 Additionally, 230 persons received chemoprophylaxis treatment.
- 14.13.5 New cases have increased by 29.6% in 2022 with tuberculosis cases going up by 39.8% and neoplasms by 25.0% indicating that social distancing may have had an impact on the incidence of communicable diseases.

15 Deaths

15.1 Inpatient deaths

- 15.1.1 6,127 inpatient deaths occurred in public hospitals in 2022 indicating 4.7% decrease compared to the previous year. 1,636 deaths were registered at Victoria Hospital followed by 1,389 at Dr A G Jeetoo Hospital, 1,007 at SSRN Hospital, 879 at J Nehru Hospital, 689 at Flacq Hospital, 141 at ENT Isolation Centre, 73 at the Cardiac Centre and less than 15 at the remaining hospitals.

Table 17: Main Primary Cause of Deaths

CAUSE OF DEATH (according to ICD-10)	2018	2019	2020	2021	2022
Diseases of the Circulatory System	1,834	1,858	1,818	2,063	1,959
Infectious and Parasitic Diseases	1,231	1,401	1,298	1,420	1,683
Diseases of the Respiratory System	619	627	601	1,396	960
Neoplasms	603	564	549	467	460
Diseases of the Digestive System	302	324	325	287	299
Diseases of the Genitourinary System	326	293	281	355	292
Others	520	505	443	443	474
Total	5,435	5,572	5,315	6,431	6,127

- 15.1.2 2,852 inpatients of 70+ years passed away representing 46.5% of all inpatient deaths followed by 1,484 patients between 60 to 69 years and 930 between 50 to 59 years. The 157 deaths of children under 12 years of age represented 2.6% of all deaths and included 135 infant deaths (2.2%). Deaths among children have increased by 6.1% this year.

- 15.1.3 Primary cause of death continued to be among diseases of the Circulatory System with 1,959 deaths (32.0%) followed by 1,683 from the Infectious and Parasitic group, 960 from the Respiratory System and 460 neoplasms among others.
- 15.1.4 11 patients passed away with diabetes as main cause of death, 2 with hypertension and 136 (2.2%) with injury. Deaths resulting from road traffic accidents accounted for 47 cases.
- 15.1.5 377 deaths carried an ill-defined condition as primary cause of death and included 270 cases of cardiogenic shock.
- 15.1.6 375 deaths (6.1%) were referred to the Police Medical Officer for autopsy involving 271 males and 104 females.
- 15.2 Outpatient deaths** - please refer to paragraph 2.2 above.

Primary Health Care Service

16.1 Introduction

16.1.1 Primary health care facilities have remained the same as in 2022, that is, 139 health centres comprising 6 Mediclinics, 19 AHCs and 114 CHCs. Pointe aux Sables CHC was closed on 30 April 2022 for the remaining year for renovation.

16.1.2 Mediclinics were functional daily from 8.00hrs to 21.00hrs except for L’Escalier Mediclinic which closed at 18.00hrs. AHCs performed extra sessions between 16.00hrs to 18.00hrs on weekdays and from 9.00hrs to 12.00hrs on Sundays and public holidays. 7 CHCs also carried out extra sessions on specific days.

16.1.3 Services at Health Centres comprised general consultation, NCD clinics and other clinics for Breast and Cervical Screening, Cash Gift, Diet and Nutrition Clinics, Family Planning, Foot Care, Maternal and Child Health, NCD Screening, Fertility Clinic and Smoking Cessation clinics. Specialist clinics of Chest diseases, Dermatology, Diabetology, General Medicine, Obstetrics and Gynaecology, Ophthalmology, Orthopaedics, Paediatrics, Psychiatry and Physical Medicine were also carried out.

16.1.4 As part of the decentralisation programme, routine cases of hospital specialist clinics have started to be directed to district hospitals, Mediclinics and AHCs.

16.2 Attendance

16.2.1 Doctors have treated 1,794,724 cases in 2022 comprising 1,660,984 visits (92.5%) for general consultation, 71,648 visits (4.0%) at other MHO consultations and 45,321 visits (2.5%) at specialist clinics. Other professionals have additionally catered to 16,771 visits (0.9%). Included in General Consultation were 327,305 (19.7%) visits at NCD clinics.

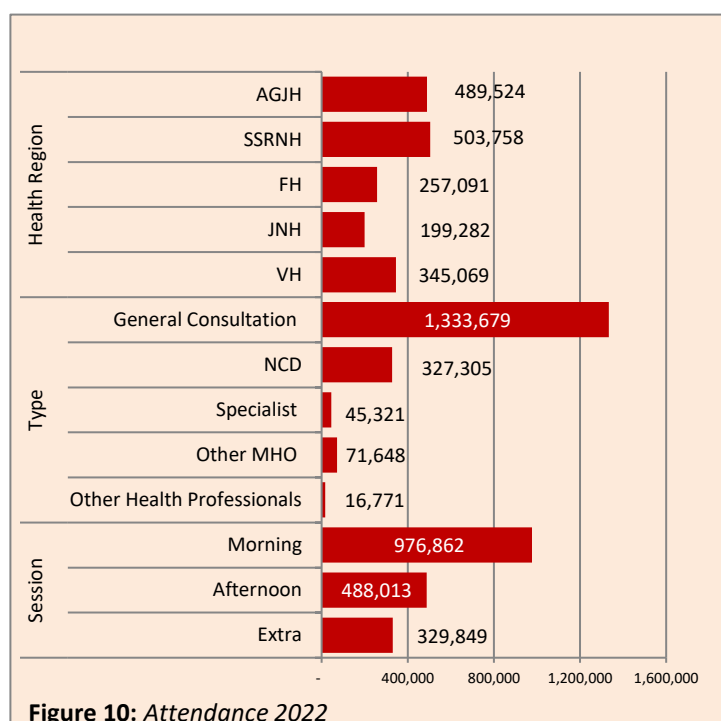

Figure 10: Attendance 2022

16.2.2 Regarding general consultations, 919,939 (55.4%) cases attended in the morning, 411,196 (24.8%) in the afternoon and 329,849 (19.9%) visits in extra sessions.

16.2.3 Total attendance has increased by *18.4%* in 2022 but has decreased by *2.3%* on average annually for period 2018 to 2022.

16.3 Attendance by Health Region

16.3.1 Health Region II has encountered 503,758 (*28.1%*) visits followed by 489,524 (*27.3%*) visits at Health Region I, 345,069 (*19.2%*) visits at Health Region V, 257,091 (*14.3%*) visits at Health Region III and 199,282 (*11.1%*) visits at Health Region IV.

16.3.2 Regarding mediclinics, highest attendance was recorded at Goodlands with 134,265 visits followed by 103,312 visits at Triolet, 65,252 visits at Belvedere, 61,856 visits at Plaine Verte, 57,590 visits at Floreal and 27,698 visits at L'Escalier.

16.3.3 Among AHCs and CHCs, Riviere Du Rempart AHC had the highest attendance of 76,972 visits followed by 41,542 visits at Ste Croix CHC, 38,141 visits at Bel Air AHC, 34,783 visits at Bambous AHC, 34,656 visits at Chemin Grenier AHC, 33,786 visits at Beau Bassin AHC, 32,450 visits at Petite Riviere AHC and 30,868 visits at Stanley CHC while the remaining health centres had recorded less than 30,000 visits.

16.3.4 Lowest attendances were recorded at Chamarel CHC, La Laura CHC and Case Noyale CHC with 1,447, 1,162 and 896 visits respectively.

16.4 Average Daily Attendance

16.4.1 Average daily attendances of up to *50* visits were registered at 103 (*74.1%*) health facilities while another 28 (*20.1%*) health facilities have catered for *51* to *100* patients and yet another 8 health facilities (*5.8 %*) had over *100* visits per day. Goodlands Mediclinic, Triolet Mediclinic and Riviere du Rempart AHC had registered an average daily attendance of more than *200* visits while Plaine Verte Mediclinic, Belvedere Mediclinic, Floreal Mediclinic, Bel Air AHC and Ste Croix CHC had attendances ranging between *101* to *200* visits.

16.4.2 Regarding mediclinics, Goodlands registered *369* visits on average per day followed by *285* visits at Triolet, *180* visits at Belvedere, *170* visits at Plaine Verte, *159* visits at Floreal and *76* visits at L' Escalier.

16.4.3 Among AHCs and CHCs, highest daily attendance of *212* visits on average was recorded at Riviere du Rempart AHC followed by *114* visits at Ste Croix CHC, *105* visits at Bel Air AHC, *98* visits at Beau Bassin Lady Twining AHC, *96* visits at Bambous AHC and *95* visits at Chemin Grenier AHC.

- 16.4.4 Goodlands Mediclinic registered the highest morning attendance at general consultations with an average of 157 visits followed by Riviere du Rempart AHC and Triolet Mediclinic with 133 and 125 visits respectively, Ste Croix CHC with 86 visits, 69 visits at Floreal Mediclinic, 67 visits at Roche Bois CHC and 66 visits at Plaine Magnien CHC. 16 facilities reckoned between 50 - 65 cases per session while 13 centres registering less than 10 cases.
- 16.4.5 In the afternoon also, Goodlands Mediclinic registered the highest average attendance of 100 visits followed by 70 visits at Triolet Mediclinic, 66 visits at Riviere du Rempart AHC, 56 visits at Roche Bois CHC, 54 visits at Tranquebar CHC and 52 visits at Belvedere Mediclinic. The other centres registered less than 50 visits including 28 centres with less than 10 cases.
- 16.4.6 During extra sessions, Goodlands Mediclinic and Triolet Mediclinic again registered the highest average attendance of 152 and 117 visits respectively followed by 80 visits at Belvedere Mediclinic, 76 visits at Plaine Verte Mediclinic, 66 visits at Floreal Mediclinic, 52 visits at Riviere du Rempart AHC, 43 visits at Ste Croix CHC and 32 visits at Bel Air AHC.
- 16.4.7 Primary health centres have encountered 4,917 visits daily in 2022 compared to 4,154 visits in 2021.

16.5 Other MHO Consultations

- 16.5.1 MHO consultations consisted of attendances for the following services: Breast and Cervical Screening, Cash Gift, Family Planning, Maternal and Child Health, NCD Screening and Smoking Cessation Clinics. New Fertility Clinic was introduced on 10 January 2022 at Triolet Mediclinic and 2 August 2022 at Montagne Blanche AHC.

Table 18: Other MHO Attendances – 2022

Service	No. of Health Centres	Attendance	Average attendance per session
Breast & Cervical Screening	16	2,123	4
Cash Gift	138	16,993	3
Family Planning	139	25,450	4
Maternal & Child Health	139	26,819	4
NCD Mobile Screening	2	101	2
Fertility Clinic	2	35	1
Smoking Cessation Clinic	1	127	3

- 16.5.2 71,648 visits were registered with an average of 4 cases seen per session.
- 16.5.3 Attendance was almost the same as last year but has gone down by 4.2% on average annually for period 2018 to 2022.
- 16.5.4 Health Region I has encountered 22,621 visits (31.6%) followed by 15,790 visits (22.0%) at Health Region II, 13,307 visits (18.6%) at Health Region V, 11,471 visits (16.0%) at Health Region III and 8,459 visits (11.8%) at Health Region IV.

16.5.5 Baie du Tombeau CHC has encountered the highest attendance of 2,256 visits for the whole year followed by 2,123 visits at Ste Croix CHC, 1,956 visits at Goodlands Mediclinic, 1,711 visits at Bambous AHC and 1,424 visits at Triolet Mediclinic while the rest have recorded less than 1,400 visits. 9 centres recorded less than 100 visits with the lowest attendance of 78 visits at La Laura CHC, 75 visits at L'Esperance CHC, 65 visits at Pellegrin CHC and 36 visits at Camp Thorel CHC.

16.5.6 All health centres have conducted Family Planning and Maternal and/or Child Health clinics reckoning an average attendance of 4 cases for Family Planning, Maternal and Child Health clinics and 3 cases for Cash Gift activities.

16.6 Specialist Clinics

16.6.1 Decentralisation of seven specialist clinics have started at 13 Health Centres this year. Orthopaedics Clinics started on 1 July and Chest Diseases clinics started on 13 July 2022 at Belvedere Mediclinic and new Orthopaedics clinics on 15 November at Plaine Verte Mediclinic, 5 December at Triolet Mediclinic and 13 December at Goodlands Mediclinic. Physical Medicine Clinic was introduced on 7 and 8 September 2022 at Goodlands and Floreal Mediclinic respectively.

16.6.2 31 health centres conducted Diabetology clinics followed by Obstetrics and Gynaecology clinics at 21 centres, Psychiatry clinics at 20 health centres, Paediatrics clinics at 17 health centres, General Medicine at 5 health centres, Dermatology clinics at 5 health centres, Orthopaedics at 4 health centres, Physical Medicine clinics at 3 health centres and Ophthalmology and Chest Diseases clinics at one health centre each.

16.6.3 45,321 visits were encountered in 4,375 sessions which ranged from 7 to 32 cases per session. Highest attendance was registered at Diabetology Clinics with 25,584 visits representing 56.5% of all visits. It was followed by 9,611 visits (21.2%) at Psychiatry clinics, 6,178 visits (13.6%) at Obstetrics and Gynaecology clinics, 1,402 visits (3.1%) at General Medicine and 997 visits (2.2%) at Physical Medicine. The other clinics catered around 700 - 800 cases except for Ophthalmology services where 49 sessions were held at Belvedere Mediclinic but only 10 cases were encountered.

16.6.4 Attendance has increased by 32.5% in 2022 and 5.6% annually between 2018 and 2022.

16.7 Other Health Professionals clinics

16.7.1 Diet and Nutrition Clinics were conducted at 50 health centres with 10,080 visits encountered in 1,133 sessions. An average of 9 cases was seen per session.

- 16.7.2 Highest of 904 visits was encountered at L'Escalier Mediclinic in 73 sessions followed by 704 visits in 51 sessions at Belvedere Mediclinic, 651 visits in 56 sessions at Rose Belle AHC, 522 visits in 44 sessions at Triolet Mediclinic, 448 visits in 59 sessions at Flacq AHC, 446 visits in 41 sessions at Stanley CHC, 418 visits in 29 sessions at Montagne Blanche AHC, 408 visits in 40 sessions at Goodlands Mediclinic, 339 visits in 30 sessions at Bramsthan AHC and 303 visits in 31 sessions at Riviere du Rempart AHC among others. Only 4 cases were encountered at Case Noyale CHC.
- 16.7.3 Foot Care clinics were conducted at 9 primary health care centres. 6,691 visits were encountered in 947 sessions with an average of 7 cases per session.
- 16.7.4 Foot Care clinics at Goodlands Mediclinic have registered 1,588 cases in 204 sessions followed by 1,235 cases at Triolet Mediclinic in 200 sessions, 1,208 visits at Plaine Verte Mediclinic in 100 sessions, 1,051 visits at Beau Bassin AHC in 105 sessions, 588 visits at L'Escalier Mediclinic in 122 sessions, 421 visits at Trefles CHC in 62 sessions, 321 visits at Phoenix CHC in 92 sessions, 147 visits at Hollyrood CHC in 17 sessions and 132 visits at Dagotiere CHC in 45 sessions..
- 16.7.5 Activities of Diet and Nutrition and Foot Care clinics have increased by 9.1% and 46.1% respectively in 2022. For period 2018 to 2022, attendance at Diet and Nutrition clinics has gone down by 2.0% on average annually and 8.3% at Foot Care clinics.

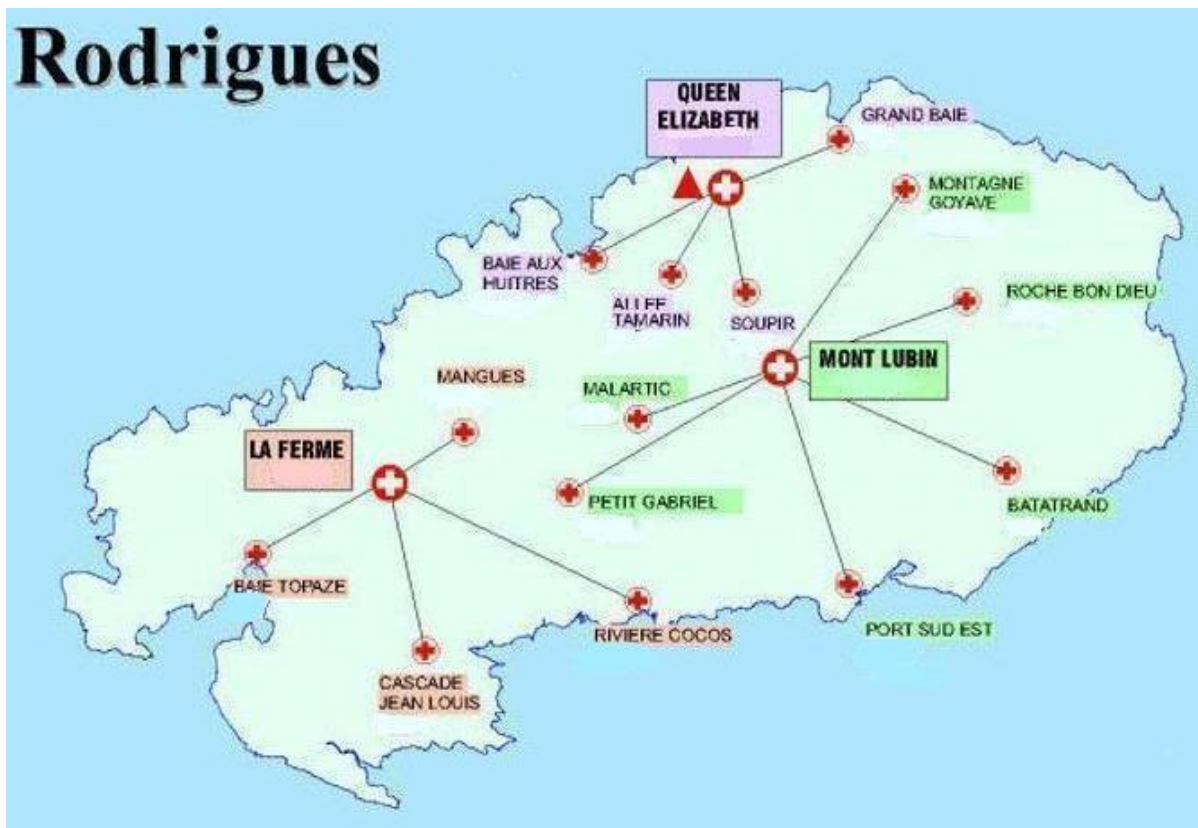

16.8 Lowest Attendances

- 16.8.1 Lowest attendances were recorded at Ophthalmology (Laser) clinics at Belvedere Mediclinic where only 10 cases were encountered in 49 planned clinic sessions.
- 16.8.2 Out of 4,375 planned sessions held for specialist clinics, 467 sessions had no attendances in the following specialties: 213 sessions in Paediatrics clinics, 93 sessions in Obstetrics and Gynaecology clinics, 48 sessions in Diabetology clinics, 40 sessions in Ophthalmology clinics, 33 sessions in Psychiatry clinics, 18 sessions in Orthopaedics clinics, 11 sessions in Chest Diseases Clinic, 7 sessions in General Medicine clinics and 4 sessions in Physical Medicine clinics.
- 16.8.3 Belvedere Mediclinic did not have any patient in 40 Ophthalmology clinic sessions followed by 36 clinic sessions in Paediatrics clinic at Plaine Verte Mediclinic, 31 clinic sessions at Montagne Blanche AHC, 28 clinic sessions at Beau Bassin AHC and 25 clinics sessions at Goodlands Mediclinic among others. For Diabetology clinics, there were no patients in 17 clinic sessions at Goodlands Mediclinic and 15 sessions at Triolet Mediclinic among others. For Obstetrics and Gynaecology clinics, there were no patients in 14 sessions at Bramsthan AHC and 11 clinics

sessions at Bambous AHC. There were no patients in 12 sessions at Belvedere Mediclinic for Orthopaedics clinics.

- 16.8.4 Family planning service did not register any case at Camp Thorel CHC. Else, an average of 4 cases was encountered per session.

ISLAND OF RODRIGUES

Overview of the Health Service in 2022

The Island of Rodrigues had an estimated mid-year resident population of 44,783 inhabitants in 2022 comprising 21,881 males and 22,902 females. 31.0% of the population was under 18 years of age, 55.3% was between 18 to 59 years and 13.7% was 60 years and above.

Health services were provided free of cost by the Republic of Mauritius to every citizen of the Island of Rodrigues. The Queen Elizabeth Hospital, Mont Lubin and La Ferme AHCs together with 12 CHCs are the most prominent institutions that provide care and treatment to the whole population. Allee Tamarin and Malartic CHCs were not operational in 2022.

Full-time facilities are available in the specialties of General Medicine, General Surgery, Orthopaedics, Obstetrics and Gynaecology, Paediatrics and Psychiatry while specialists in other disciplines undertake periodic visits to the Island. Cases requiring additional care and treatment are transferred to Mauritius free of charge.

Owing to the prevalence of the COVID-19 pandemic in the Island, the Mont Lubin AHC was converted into an Isolation Centre as from April 2020. Its outpatient service was moved opposite the supermarket in August 2022 after a temporary shift to the Mary Gontrand Senior Citizen Office.

Almost all services are manned locally except for a large number of doctors and few other officers in the departments of Health Records, Laboratory and Radiology services who come on tour of service from Mauritius.

The Haemodialysis Unit of Queen Elizabeth Hospital is equipped with 11 dialysis machines that operate 3 sessions per day.

The e-health system was partially in use at the Accident and Emergency Department only.

Executive Summary - Rodrigues

- 17.1.1 Activities have been below normal in the Island of Rodrigues for the second consecutive year in the wake of the COVID-19 pandemic. Allee Tamarin and Malartic CHCs were still not operational while main visiting specialists from Mauritius have effected their respective visits in 2022.
- 17.1.2 266,079 visits were encountered at public health institutions in Rodrigues indicating 3.9% drop in attendances compared to 2021 and 729 visits on average per day.
- 17.1.3 At the Accident and Emergency Department, 116,865 visits for consultation were registered indicating 12.5% increase in 2022 following drop of last year. Queen Elizabeth Hospital catered for an average of 128 visits daily, 103 visits at Mont Lubin AHC and 89 at La Ferme AHC.
- 17.1.4 36,724 cases were seen by nursing officers at the three main institutions in spite of doctors being available onsite.
- 17.1.5 The Sorted OPD catered for 48,894 visits depicting 6.1% increase in attendance with significant growths resulting from the coming of visiting specialists.
- 17.1.6 The twelve Community Health Centres have registered 37,431 visits indicating 31.5% drop, probably consequent to the substantial increase of 2021. Only Montagne Goyave CHC has registered 30.6% increase in attendance.
- 17.1.7 Local Dental Clinics attended to 13,231 cases indicating 22.5% drop in attendances. The service was not available at Mont Lubin AHC. Dental extractions have gone down by 18.2% affecting both adults and children and deciduous and permanent teeth equally.
- 17.1.8 Visiting specialists from Mauritius have undertaken 36 visits and have seen 5,663 cases. 2,734 cases were on the waiting list as at 31 December 2022 including 1,325 cases for the Department of Ophthalmology and 382 for Cardiology. Nephrologists have stayed in the Island for 7 days during each of the two visits but have conducted 1 – 2 outpatient clinic sessions only.
- 17.1.9 10,623 admissions occupied 42.0% of beds and 3.0 days of stay indicating 9.7% decrease in activity of wards. However, Mont Lubin AHC was reserved as isolation centre which catered for 185 COVID-19 cases only. 145 inpatient deaths included 6 from Mont Lubin AHC accounting for an overall Fatality Ratio of 1.3%.

- 17.1.10 1,751 surgeries were carried out consisting of 1,354 cases performed by resident specialists and 397 by visiting ones. Surgeries have increased by 3.0% owing to coming of visiting surgeons.
- 17.1.11 As in the previous two years, the Department of Obstetrics and Gynaecology has performed the highest of 514 surgeries followed by 501 cases by General Surgery.
- 17.1.12 846 deliveries were carried out including the two Area Health Centres which undertook 5 breech and 526 normal deliveries. They have gone down by 2.9% and caesarean sections have also decreased to 37.0% of total deliveries.
- 17.1.13 5 neonatal deaths and 2 stillbirths this year indicated drops in infant mortality. However, 1 maternal death was encountered after seven years. Low birthweight cases have increased from 10.2% in 2021 to 13.0% of total births.
- 17.1.14 Attendance at Smoking Cessation Clinics has been going down over the years with only 10 follow-up cases treated this year.
- 17.1.15 Activity has gone down by 7.1% at Diet Clinics, 14.7% at Physiotherapy and 5.8% at Radiology services but has increased by 16.2% at Haemodialysis sessions, 5.8% at Chemotherapy sessions and 24.8% in laboratory tests. The Retinal Screening and Foot Care services were not available in 2022.
- 17.1.16 13,175 COVID-19 cases were recorded in 2022, out of which 185 were admitted at Mont Lubin Isolation Centre and 6 deaths were encountered.

Overall Attendance

- 18.1.1 Queen Elizabeth Hospital together with Mont Lubin AHC and La Ferme AHC provided primary care and inpatient service on a 24-hour basis backed by 12 CHCs which operated during normal working hours only.
- 18.1.2 266,079 contacts have taken place across all health institutions. Overall ambulatory attendance comprised 100,258 cases (37.7%) at Queen Elizabeth Hospital, 70,471 cases (26.3%) at Mont Lubin AHC, 58,462 cases (22.0%) at La Ferme AHC and 29,436 (14.0%) at the CHCs.
- 18.1.3 Attendance has gone down by 31.5% at CHCs due to the pandemic but has increased at Queen Elizabeth Hospital and the two AHCs. However, attendance at Montagne Goyave CHC has also increased by 30.6% compared to last year.
- 18.1.4 An average of 729 persons has attended local health institutions daily in 2022.

- 18.1.5 Visits have gone down by 3.9% in 2022 and 0.2% on average annually for the five-year period of 2018 – 2022.

Accident and Emergency Department

- 19.1.1 The Accident and Emergency Departments at Queen Elizabeth Hospital, Mont Lubin AHC and La Ferme AHC have received 116,865 visits during the year.

- 19.1.2 As in the previous years, Queen Elizabeth Hospital had the highest attendance of 46,730 (40.0%) visits followed by Mont Lubin AHC with 37,487 visits (32.1%) and La Ferme AHC with 32,648 visits (27.9%).
- 19.1.3 An average of 320 patients was seen by doctors daily with 128 cases at Queen Elizabeth Hospital, 103 at Mont Lubin AHC and 89 at La Ferme AHC depicting an increase in attendance.
- 19.1.4 Attendance has thus gone up by 12.5% in 2022 including 9.7% increase at Queen Elizabeth Hospital, 13.3% at Mont Lubin AHC and 15.7% at La Ferme AHC. An annual growth of 1.1% is noted for the five-year period of 2018 – 2022.
- 19.1.5 Attendance has followed the usual trends of normal years with some increase during the winter season followed by drops in the last months of the year.
- 19.1.6 Nursing officers have catered for 36,374 visits including advice tendered to some 30,613 patients and having carried out some 22,271 sutures and dressings. Patients seen by nurses while doctors were available has increased by 5.9% this year.

Sorted Outpatient Department

MHOs conducted Outpatient Clinics of INR and Oncology as from 2020 but have been reported hereunder as from this year. It is also to be noted that local authorities have appointed a private practitioner to carry out Gastroenterology outpatient clinics as from 2020.

20.1 Sessions

- 20.1.1 1,936 clinic sessions were held at Queen Elizabeth Hospital and the two AHCs comprising 861 sessions of resident specialists, 164 of visiting specialists, 518 antenatal clinics and 393 MHO clinics.
- 20.1.2 Clinic sessions of resident specialists have gone down by 6.9% but those of visiting specialists have gone up from 26 in 2021 to 164 owing to waiving of air travel restrictions. Sessions of antenatal and NCD clinics have remained stable but MHO clinics depict an increase with the inclusion of INR and Oncology clinics as from this year. Clinic sessions have gone up by 2.5% on the whole owing to increased arrivals of visiting specialists.
- 20.1.3 Queen Elizabeth Hospital has conducted 918 sessions (46.2%) followed by 548 and 470 sessions at Mont Lubin AHC and La Ferme AHC respectively. Sessions have

gone up by 8.8% at Queen Elizabeth Hospital and 5.0% at Mont Lubin AHC but have gone down 10.1% at La Ferme AHC.

20.1.4 Each specialty among resident ones has conducted between 130 to 155 sessions in 2022, remaining stable over the years. Sessions among visiting specialists obviously had large variations.

20.1.5 While sessions have continuously increased in the last three years, it still reckoned 2.7% drop on average annually between 2018 and 2022.

20.2 New Cases

20.2.1 6,504 new cases were registered indicating 17.0% increase in 2022. Resident specialists have seen 3,122 cases showing a drop of 8.6% while visiting specialists have seen 1,987 cases depicting 421.5% increase with opening of air access.

20.2.2 The Department of Orthopaedics has recorded 860 new cases followed by 712 for General Surgery, 692 for Cardiology, 531 for General Medicine, 477 for Ophthalmology, 419 for Obstetrics and Gynaecology and the rest having seen less than 400 cases each.

20.3 Overall attendance

20.3.1 48,894 cases were seen at the Sorted Outpatient Department consisting of 27,196 cases seen by resident specialists, 5,663 cases by visiting specialists, 7,768 cases in NCD clinics, 6,818 cases at antenatal clinics and 1,449 cases at other MHO clinics. Average of 25 cases per clinic session was the same as the last two years.

20.3.2 Overall attendance has still increased by 6.1% and thus shows an average annual increase of 2.7% between 2018 and 2022.

20.4 Resident Specialist clinics

20.4.1 Attendance at clinics of resident specialists has gone down by 2.5% with only 7.7% increase at the Department of Paediatrics and 0.4% in General Surgery.

20.4.2 Resident specialists have seen an average of 38 cases per session at Queen Elizabeth Hospital, 27 cases at Mont Lubin AHC and 24 cases at La Ferme AHC. Most specialties have seen between 30 and 40 cases on average per session.

20.5 Visiting Specialist clinics

20.5.1 Attendance at all Visiting Specialists clinics has gone up amounting to 469.7% increase.

20.6 MHO clinics

- 20.6.1 Clinics of INR and Oncology have been added as from this year.
- 20.6.2 Attendance at Antenatal and NCD clinics have gone down by 11.8% and 3.2% respectively while those of INR and Oncology have gone up by 1.2% and 3.6%.

20.7 Attendance by Health Institution

- 20.7.1 Queen Elizabeth Hospital has catered for 28,300 cases followed by 11,650 cases at Mont Lubin AHC and 8,944 cases at La Ferme AHC. Attendance has increased by 10.2% at Queen Elizabeth Hospital, 0.8% at Mont Lubin AHC and 1.3% at La Ferme AHC.
- 20.7.2 An average of 31 cases was seen per clinic session at Queen Elizabeth Hospital, 21 at Mont Lubin AHC and 19 at La Ferme AHC.
- 20.7.3 2,924 visits were encountered at NCD clinics of Queen Elizabeth Hospital followed by 2,626 cases at Mont Lubin AHC and 2,218 cases at La Ferme AHC.
- 20.7.4 6,818 cases were seen at Antenatal Clinics of all public health institutions. 2,842 cases were seen at Mont Lubin AHC Region followed by 2,098 cases at Queen Elizabeth Hospital Region and 1,878 cases at La Ferme AHC Region.

20.8 Attendance by Specialty

- 20.8.1 Resident specialists provided round-the-clock service at the Departments of General Medicine, General Surgery, Obstetrics and Gynaecology, Orthopaedics, Paediatrics and Psychiatry. In addition, except for Neurology, all other specialists have visited the Island in 2022.
- 20.8.2 The Department of General Medicine recorded the highest of 6,269 cases followed by 5,472 cases at Orthopaedics, 4,707 for General Surgery and 4,419 for Psychiatry while among visiting specialists, the Department of Ophtalmology has seen 1,622 cases and 1,151 by ENT among others.

Community Health Centres

- 21.1.1 Allee Tamarin and Malartic CHCs were still closed following lockdown of 2020 while the remaining ones had reduced activities following active COVID-19 cases detected on the Island.

- 21.1.2 Twelve CHCs have thus seen 37,375 cases depicting 31.5% drop in 2022 and 3.1% annually for the period 2018 to 2022.
- 21.1.3 Petit Gabriel CHC has registered the highest of 8,534 visits followed by 7,733 visits at Riviere Cocos CHC, 6,906 at Roche Bon Dieu CHC, 3,995 at Oyster Bay CHC and less than 3,000 visits at the remaining ones. Four CHCs have registered less than 1,000 cases during the year.
- 21.1.4 Attendance has gone down between 14 to 79% at all CHCs in 2022 except for Montagne Goyave CHC which has reckoned 30.6% increase.
- 21.1.5 Doctor consultation sessions have increased from 2 to 4 sessions at Petit Gabriel CHC, Riviere Cocos CHC and Roche Bon Dieu CHC as from September 2022.

Dental Service

- 22.1.1 Basic dental service comprising care and treatment, dental extractions, fillings and scaling was provided by 2 dental surgeons in post in the Island. Resident dental surgeons provided Endodontic Service while visiting surgeons carry out Orthodontics and Oral Surgery clinics whenever they visit the Island.
- 22.1.2 13,231 cases were treated by the Dental Service in 1,081 sessions comprising 7,237 cases seen in 580 sessions at Queen Elizabeth Hospital and the remaining 5,994 cases in 501 sessions at La Ferme AHC. The service was not available at the relocated Mont Lubin AHC.
- 22.1.3 The decrease for an average of 12 cases per session in 2022 resulted from the relocation of Mont Lubin CHC.
- 22.1.4 Following trend of last year, 83.2% of visits were encountered in the morning with a reduced average attendance of 17 cases per session while afternoon sessions catered for some 5 cases.
- 22.1.5 Endodontic treatment was provided in 152 cases only.
- 22.1.6 5,031 dental extractions were carried out comprising 3,533 extractions of permanent teeth and 1,498 cases of deciduous teeth. 130 cases of permanent tooth extraction were carried out on children. Extractions have gone down by 18.2%, with extraction of permanent teeth reckoning 16.6% drop and deciduous ones going down by 21.6% in 2022. Extraction of permanent teeth among children has also gone down by 5.1% in 2022. In the last five years, the average annual drop in dental extractions was 4.9%.

- 22.1.7 3,536 dental fillings were carried out comprising 1,936 cases at Queen Elizabeth Hospital and 1,600 cases at La Ferme AHC. They included 731 fillings carried out on children of less than 12 years. Fillings have gone down by 13.1% this year.
- 22.1.8 Pit and Fissure sealant was applied on 4 cases at La Ferme AHC.
- 22.1.9 Activity of Dental clinics has gone down by 22.5% this year also indicating an annual drop of 6.0% between 2018 and 2022.

Visiting Specialists/Teams

- 23.1.1 All major specialties and other health professionals have visited the Island in 2022 except for Neurology. 45 visits were effected for a total of 330 days of stay.
- 23.1.2 The Department of Cardiology has undertaken 10 visits including Paediatrics Cardiology followed by 5 visits by the Department of ENT and Ophthalmology, 4 by Physical Medicine, 3 by Oncology, 2 by Dermatology, Gastroenterology, Nephrology, Neurosurgery and Oral Surgery and 1 by Plastic Surgery.
- 23.1.3 164 outpatient clinic sessions were carried out consisting of 55 sessions in the Department of Cardiology followed by 26 in Ophthalmology, 18 in ENT, 17 in Oncology and Physical Medicine, 15 in Paediatrics Cardiology, 10 in Dermatology, 9 in Neurosurgery, 8 in Gastroenterology, 3 in Nephrology and 1 in Plastic Surgery.
- 23.1.4 Nephrologists have stayed in the Island for 7 days during each of the two visits and have conducted 1 – 2 outpatient clinic sessions only. 15 patients were on waiting list as at 31 December 2022.
- 23.1.5 5,663 cases were seen consisting of 1,987 new cases and 3,676 follow-ups. The Department of Ophthalmology had attended to the highest of 1,622 cases followed by 1,171 by Cardiology, 1,151 cases by ENT, 525 by Physical Medicine and less than 500 cases by each of the remaining specialties.
- 23.1.6 Additionally, 240 cases were seen in 2 visits by Oral Surgery and 284 in 3 visits by Orthodontics.
- 23.1.7 Other health professionals in Orthopaedic Appliances Workshop have catered to 225 cases and Speech Therapy to 143 cases.
- 23.1.8 As at 31 December 2022, 2,734 cases were on the waiting list of visiting specialists indicating 23.9% drop. The Department of Ophthalmology had the longest list of

1,325 cases followed by 382 at Cardiology, 355 at ENT and less than 200 cases individually at the remaining specialties.

- 23.1.9 119 cases were waiting in Oral Surgery and 119 in Orthodontics while the Orthopaedics Workshop had 96 cases on list and 82 for the Speech Therapy Department.

Inpatient Service

23.1 Bed availability

- 23.1.1 The old building of Mont Lubin AHC was still used as Isolation Centre in 2022 while inpatient service for routine cases was not provided at the new location.
- 23.1.2 16 wards were functioning in 2022 comprising 8 wards at Queen Elizabeth Hospital, 5 at the old Mont Lubin AHC and 3 at La Ferme AHC.
- 23.1.3 An average of 198 general beds were daily available in 2022 consisting of 180 beds at Queen Elizabeth Hospital and 18 at La Ferme AHC. 30 beds were exclusively reserved for isolation at Mont Lubin AHC.

23.2 Admissions

- 23.2.1 10,623 cases were admitted this year indicating 4.6% drop. La Ferme AHC registered a major drop of 57.0% against the high increase of 55.0% in 2021. For the five-year period of 2018 to 2022, admissions have gone down by 1.2% on average every year.

23.3 Bed Occupancy

- 23.3.1 Bed occupancy has gone to its lowest of 42.0% during these last five years. While Queen Elizabeth Hospital recorded 50.7% occupancy, beds were only 7.6% occupied at Mont Lubin AHC and 5.6% at La Ferme AHC.
- 23.3.2 Female GOS Ward at Queen Elizabeth Hospital reckoned the highest bed occupancy of 68.7% while Male Wards of Mont Lubin and La Ferme AHCs registered the highest of 15.3% and 7.9% occupancy respectively.
- 23.3.3 95 adults and 470 newborns were admitted in the respective intensive care units.

23.4 Length of stay

- 23.4.1 Length of stay was around the normal of 3.0 days including that of 3.6 days at Mont Lubin AHC and 1.0 day at La Ferme AHC.

23.4.2 On the other hand, turnover interval, that is, the time a bed remaining vacant between a patient leaving it and another one occupying it, was 2.9 days at Queen Elizabeth Hospital, 44.0 days at Mont Lubin AHC and 16.6 days at La Ferme AHC

23.5 Inpatient deaths

23.5.1 145 inpatient deaths took place with Fatality Ratio being 1.3% of all discharges.

23.5.2 Deaths among those aged 70 or more have increased by 7.5% this year compared to 2021. 12 infants of less than 1 year and 3 children below 12 years of age have passed away.

23.6 Isolation for COVID-19

23.6.1 185 patients were admitted with COVID-19 at the Mont Lubin Isolation Centre and 6 of them passed away. 767 bed days were used with an average length of stay of 3.6 days.

Surgeries performed

24.1.1 Surgeries were carried out at Queen Elizabeth Hospital only.

24.1.2 1,751 surgeries took place in 837 sessions. 1,354 cases were undertaken by resident specialists and 397 cases by visiting surgeons.

24.1.3 1,151 planned surgeries were carried out in 348 planned sessions while 600 emergencies were carried out in 489 sessions.

24.1.4 Surgeries have increased by 3.0% in 2022 but resulted in 1.5% fall on average annually from 2018 to 2022.

24.1.5 As in 2020 and 2021, the Department of Obstetrics and Gynaecology has performed the highest number of surgeries with 514 cases. This was followed by 501 cases in General Surgery and 339 in Orthopaedics. As for the visiting specialties, 209 cases were performed by ENT, 158 by Ophthalmology and 23 by Plastic Surgery.

24.1.6 An average of 3 surgeries was carried out in cold sessions and only 1 case during emergency sessions. Both resident and visiting surgeons have performed some 2 cases per session.

24.1.7 1,041 surgeries were carried under general anaesthesia and 26 cases required spinal anaesthesia.

Deliveries and Births

- 25.1.1 Deliveries were mainly carried out at Queen Elizabeth Hospital and only 21 cases at the two AHCs. 846 deliveries were carried out in 2022 indicating 2.9% drop and an average annual increase of 1.3% for period 2018 to 2022.
- 25.1.2 Total deliveries consisted of 526 (62.2%) normal ones, 313 (37.0%) caesarean sections, 2 forceps and 5 breech deliveries (0.8%). 825 deliveries took place at Queen Elizabeth Hospital, 10 at Mont Lubin AHC and 11 at La Ferme AHC.
- 25.1.3 Caesarean sections have dropped for two consecutive years, from 38.5% in 2020 to 37.5% in 2021 and 37.0% in 2022.
- 25.1.4 Both AHCs have carried out normal deliveries except for 1 breech delivery performed at Mont Lubin AHC.
- 25.1.5 854 births took place consisting of 842 single and 6 twin deliveries.
- 25.1.6 5 neonatal deaths were encountered and 2 stillbirths. 1 maternal death occurred after seven years.
- 25.1.7 Rate of stillbirth was 0.2% of all births in 2022 but low birthweight was increased to 23.3% depicting an increase compared to 2021.

Support Services

26.1 Chemotherapy

- 26.1.1 167 patients have undergone 202 sessions of chemotherapy indicating 9.1% increase in sessions and being the highest attendance in the last five years.

26.2 Diet and Nutrition Clinics

- 26.2.1 3,909 cases, of which 1,591 were new patients, were seen by local dietitians. Mont Lubin AHC has catered for 1,619 cases followed by 1,182 cases at Queen Elizabeth Hospital and 1,108 at La Ferme AHC.
- 26.2.2 New cases have gone down by 9.1% and total attendance by 7.1%.
- 26.2.3 Queen Elizabeth Hospital has seen the highest of some 11 visits per session followed by 7 visits at La Ferme AHC and 5 visits at Mont Lubin AHC.

26.3 Foot Care

26.3.1 It was reported that space was unavailable to host this activity.

26.4 Haemodialysis

1.1.1 11 haemodialysis machines were in use at Queen Elizabeth Hospital for 3 sessions per day. 56 patients were on haemodialysis during 2022 including 21 new cases. 14 patients passed away during the year while 37 patients were still on dialysis at the end of the year. 6,301 haemodialysis sessions were carried out.

26.4.1 Haemodialysis sessions have increased by 3.7% resulting in 4.1% average annual increase for the last five years.

26.5 Laboratory Service

26.5.1 Six Sections of the Laboratory Service have processed 408,229 specimens and performed 911,655 pathological tests indicating 24.8% increase in 2022. Tests have thus increased by 12.9% on average every year for period 2018 to 2022.

26.5.2 As usual, the Haematology Section has conducted the highest number of tests compared to the other sections. It has performed 408,222 tests (44.8%) followed by 295,479 tests (32.4%) by the Biochemistry Section and 110,503 test by the Virology Section among others.

26.5.3 All Sections have registered an increase in activity except for a drop of 0.4% at the Biochemistry Department. A consequent increase of 168.8% resulting in 69,000 more tests is noted at Virology Department.

26.5.4 9,616 specimens were sent to Mauritius for testing.

26.6 Physiotherapy

26.6.1 This Service was available at Queen Elizabeth Hospital only and has catered for 4,541 visits which comprised 2,568 outpatients and 1,973 inpatients. New patients accounted for 26.9% of all attendances indicating consecutive increase over the last two years.

26.6.2 Attendance has however again gone down by 14.6% in 2022 and 5.0% on average every year in the last five years.

26.7 Retinal Screening

26.7.1 It was reported that equipment is out of order since November 2020.

26.8 Smoking Cessation Clinic

26.8.1 Queen Elizabeth Hospital conducted one monthly session where only 10 follow-up cases were seen.

26.9 Stress Test

26.9.1 37 Stress Tests were performed which can be considered as normal activity.

26.10 X-ray Examinations

26.10.1 17,543 x-ray examinations were carried out consisting of 17,376 cases at Queen Elizabeth Hospital and 167 cases at Mont Lubin AHC. Cases have gone down by 5.8% this year being the fourth consecutive yearly drop. It thus indicates average drop of 1.2% annually in the last five years.

26.10.2 As usual, highest number of x-ray examinations were carried out on extremities (6,600) followed by 3,232 examinations of the chest, 1,599 of the skull, 1,126 of the spine and 655 of the abdomen. 1,297 CT-Scans and 3,004 echography examinations were also performed and the remaining ones were less than 25 cases.

26.10.3 Examinations on Extremities and Skull have increased by 15.2% and 15.8% respectively and have gone down for the remaining ones.

Surveillance of Diseases

27.1 Conjunctivitis

27.1.1 441 cases were registered in 2022 with 186 cases at Queen Elizabeth Hospital, 147 at Mont Lubin AHC and 108 at La Ferme AHC. Average monthly attendance was 37 cases with the highest of 66 cases recorded in November and the lowest of 10 cases in February. The situation was stable even if a slight increase was noted.

27.2 Gastroenteritis

27.2.1 3,831 cases were registered with Mont Lubin AHC recording the highest of 1,508 cases followed by 1,209 at Queen Elizabeth Hospital and 1,114 at La Ferme AHC. Cases have gone up by 129.4% on the whole, equally distributed among the three health facilities. Cases have thus increased by 11.3% on average every year between 2018 and 2022.

27.2.2 Average monthly attendance was 319 compared to 139 cases last year with the highest of 1,310 cases recorded in October and the lowest of 43 cases in February.

27.3 URTI (Upper Respiratory Tract Infection)

27.3.1 16,499 cases were registered with La Ferme AHC recording the highest of 6,049 cases followed by 5,506 cases at Mont Lubin AHC and 4,944 cases at Queen Elizabeth Hospital. Cases have increased by 71.5% at all institutions while showing 2.0% drop annually in the last five years.

27.3.2 Average monthly attendance has increased from 802 cases in 2021 to 1,375 cases this year with the highest of 2,420 cases recorded in September and the lowest of 291 cases in February.

27.4 Others

27.4.1 42 amputations, 62 tubal ligations and 4 AV Fistula were performed. Cases of amputation have gone up by 20.0% and those of tubal ligation by 5.1%.

NCD Mobile Screening Service

28.1.1 43 screening sessions were held at 38 different sites in 2022 where 2,032 persons were registered resulting in an average of 47 cases per session.

28.1.2 Attendance included 1,409 persons from the community and 623 students from 3 schools.

28.1.3 17 probable new cases of diabetes mellitus were detected among adults only. 64 probable new cases of hypertension were also detected including 4 students. 186 persons were found to be overweight and another 257 were obese. These included 52 overweight and 70 obese students. Overweight and obesity represented 9.2% and 12.6% of total attendance respectively.

Agalega and Other Outer Islands

The Island of Agalega had a mid-year resident population of 274 inhabitants comprising 174 males (63.5%) and 100 females (36.5%) excluding Indian migrant workers. No change in population is noted as from 2020.

Health service activities of the Island, which consist of two health centres, are accounted under Dr A G Jeetoo Health Region. Medical and nursing staff are deployed from Mauritius on tour of service while dentists effect quarterly visits to the Island.

Data became available as from 2018 for this Island.

- 29.1.1 15,222 contacts have taken place in 2022 representing some 42 visits daily at the two health centres. Following drops of the previous two years, attendance has increased by 33.9% this year.
- 29.1.2 7,960 doctor consultations took place indicating 33.2% increase but including 1.9% and 14.3% drops in NCDs and antennal clinic attendances respectively.
- 29.1.3 766 admissions were recorded and 79 cases were referred to Mauritius for further treatment. Admissions have gone up by 140.1%.
- 29.1.4 The Dental Service reckoned 533 visits indicating 120.2% increase.

SUMMARY STATISTICS OF GOVERNMENT HEALTH SERVICES : 2018 - 2022

[17] Vascular surgeon moved from DDYCC to VH in June 2022 and from VH to AGJH in August 2022

[18] stopped in July 2022

WEEKLY SCHEDULED SPECIALIST CLINIC SESSIONS - Change in Status compared to previous year

AGJH - 2 General Medicine sessions added in January, 1 Neurosurgery session in May and 1 Vascular surgery session started in July.

SBEH - 3 Refraction sessions added in November, and 2 Ophthalmology sessions discontinued in May

SSRNH - New Fertility Clinics were started twice monthly in February, 1 Diabetology session began in May, 1 Neurology session in June and 1 Early Dementia session in August

DDYCC - 1 Cardiac Surgery session added in December while 2 Vascular Surgery sessions were discontinued in July

FH - 1 Endocrinology session added in April, 2 Orthopaedics sessions in June, 1 ENT session in July and 1 Oncology session started in June

JNH - **Additions:** 2 General Surgery sessions added in April, 4 General Medicine in September (2) and October (2), 1 Cardiology in November and 1 Diabetology session in May and 1 in December and 1 Neurology session started in June.

Discontinued: 2 Gynaecology sessions in January, 3 General Surgery in February and 1 in April, 1 NCD in July, 2 General Medicine in October and 1 Geriatric session in November

MH - 1 Cardiology session, 1 Gynaecology session, 1 Orthopaedics session and 1 General Surgery session started in June

SH - 1 Orthopaedics session started in May, 1 Cardiology and 1 General Surgery sessions in June, 1 Gynaecology session in July and 1 Ophthalmology session added in May while 1 Dermatology session and 1 NCD session discontinued in August and 1 Diabetology session in September

VH - **New service:** 1 Vascular Surgery session in June, 1 Hepatitis C session in July, 2 Fertility clinics in August and 1 Nephrology in November.

Additions: 1 Cardiology session in January, 1 Orthopaedics in March, 1 General Medicine in June, 1 Endocrinology in August and 3 Paediatrics sessions in September

Discontinued: 1 Juvenile DM session in March, Paediatric Surgery session in May, 1 Ophthalmology session in June, 1 Hepatitis C session in July, 1 Vascular Surgery session in July, 1 Diabetology session in August and 1 Paediatrics session in September.

YCCH - 1 Diabetology session took place from April to October only

Source: Respective Support Department

[1] Figures include cases seen at health centres and outstations

[2] Service started as from February 2021 at LMH

[3] Carried out at private clinics

[4] Machine was out of order and service discontinued as from 2019

[5] Figures include inpatient and outpatient attendances

[6] Discontinued since May 2021

[7] See Activity at Health Centres at Pages 110 -112 for PHC attendances

[2] BERA is done at ENT Centre and JNH

Source: Speech Therapy Service

[3] Includes new tests introduced in 2022

[4] Decrease in activity owing to equipment breakdown for 9 months

[5] Decrease in activity owing to renovation

[6] Limited service at FH

[7] Drop in attendance in 2019 owing to shortage of staff but increase in 2020 owing to diverted patients of ENT Centre

[8] Relocated at Floreale Mediclinic as from 12 November 2020 owing to ENT Centre being converted into Isolation Centre

Shaded cells indicate service is not available

Source: Respective Support Departments

* Haemodialysis, Diet Clinic, Podiatry and Retinal Screening are carried out at SDVHC

[1] Includes cases seen at outstations

[5] Service discontinued as from May at SDVHC

[2] Includes talks given on radio, at workshops and Mobile Clinic Screening

[6] Conducted at GMC instead of SSRNH

[3] Conducted at the Beau Bassin Workshop

[7] Conducted at BMC instead of FH

[4] Service discontinued as from May 2021 at YCCH

Hospital	WARDS CLOSED			NEW WARDS			Comments
	Name of ward	Down-time (months)	Beds	Name of ward	Run-time (months)	Beds	
BSMHCC	3	10	32				Closed for renovation from 14.03.2022 onwards
	2	2.5	30				Closed for renovation up to 13.03.2022
	14	1.5	12				Closed for renovation from 01.05.2022 to 26.06.2022, opened as Female Addictology ward on 27.06.2022
JNH	0-3	6	6				Closed for renovation from 06.07.2022 onwards
VH	M2	7	10				Closed from 01.06.2022 onwards
				Renal *	8.5	16	Used for Thoracic Surgery from 09.04.2022 to 16.10.2022 and for Renal Transplant from 17.10.2022 onwards

NOTE

Data of Inpatient Activity (page 74 and 76) will not tally with Activity of Wards (page 67 to 73) as:

- i Patients may be admitted in any ward owing to 100% bed occupancy in designated ward;
- ii Length of stay includes patients of previous year discharged in the current year;
- iii Patients treated by many specialties but accounted where most utilised;

* The three wards used previously by DDYCC-VH have been converted to Renal Ward

CERTAIN CONDITIONS PRESENT AT TIME OF INPATIENT DEATH : 2022

Below is a list of common chronic conditions and others which were present around the time of death but which were not necessarily the actual cause of death.

Figures do not provide for mutually exclusive diseases, for e.g. Tuberculosis and/or Hepatitis was/were not considered in the presence of HIV/AIDS or unstable angina in other heart diseases. However, some chronic diseases have been enumerated irrespective of other closely related conditions, for e.g. Hypertension has been included even in the presence of other diseases of the circulatory system.

Text in brackets at each sub-heading indicates chapters of the International Classification of Diseases, Tenth Edition (ICD-10)

Important : These conditions are not necessarily the underlying causes of death.

GLOSSARY

ATTENDANCE	An encounter of a patient with a health facility
AVAILABLE BED DAYS \$	A bed within a staffed ward which is either already occupied by a patient or to which the hospital would be prepared to admit a patient, calculated as the number of beds minus closed beds multiplied by days in the period.
AVERAGE ANNUAL CHANGE	Is the percentage of the sum of the yearly variations in the period over the total number of years in that period
AYURVEDIC MEDICINE	A form of homeopathic or alternative medicine
BASIC CARE	Primary care and treatment
CHILD/CHILDREN	Below age of 15 years
COLD SESSION	A planned operating session for patients called from the waiting/booked list.
COLD CASE	A patient from the waiting/booked list who is operated upon in a planned operating session.
DAY CARE BED	A bed which is available during the day only and is not included in the number of available beds.
DAILY AVAILABLE BEDS	Number of beds available during a day for every staffed ward of a hospital excluding day care beds. It is usually expressed as an average for a given period.
DELIVERY	The culmination of a human pregnancy or gestation period with the birth of one or more newborn infants from a woman's uterus.
DOMESTIC VIOLENCE @	Violence in the family includes battering by intimate partners and others, sexual abuse of female children and young women, marital rape and traditional practices harmful to women. Abuse on domestic workers is not included.
EARLY NEONATAL DEATH *	Death of a newborn in the first six days after birth.
EXTRA SESSION	Hospital : a planned operating session carried out after normal working hours where cold cases only are operated upon. Health Centre : General consultations from 4.00p.m to 6.00p.m on weekdays and from 9.00a.m to 12.00hrs on Sundays and public holidays.
FATALITY RATIO	Usually expressed as a percentage, it is the number of deaths (<i>due to a given disease(s)/specialty</i>) in a given period over the total number of cases discharged and passed away (<i>to the same disease(s)/specialty</i>) in the same period.
FOLLOW-UP	Any subsequent attendance/s for the same problem at close or regular interval/s.
FRESH STILLBIRTH #	Death in utero; failure of the product of conception to show evidence of respiration, heart beat, or definite movement of a voluntary muscle after expulsion from the uterus, with no possibility of resuscitation.
HEALTH INSTITUTION	Health facility
INPATIENT #	A patient who comes to a hospital or other health care facility for diagnosis or treatment and requires an overnight stay.
LATE NEONATAL DEATH *	Death of a newborn occurred after the 7th day but before 28 completed days of life.
LENGTH OF STAY \$	The time in days from start to finish of a consultant episode, ward stay or hospital stay; obtained by dividing the number of discharges and deaths into the total occupied beds.
LIVE BIRTH *	Is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of the pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached; each product of such a birth is considered liveborn.

GLOSSARY

LOW BIRTHWEIGHT #	The first weight of the foetus or newborn obtained after birth and weighing less than 2,500 grams (up to and including 2,499 grams).
MACERATED STILLBIRTH #	The degenerative changes with discolouration and softening of tissues and eventual disintegration of a foetus retained in the uterus after its death.
MATERNAL DEATH *	Also known as <i>maternal mortality</i> . The death of a woman while pregnant or within 42 days of termination of pregnancy, irrespective of the duration and site of the pregnancy, from any cause related to or aggravated by the pregnancy or its management but not from accidental or incidental causes.
MATERNAL DEATH types *	<p>Direct maternal death: that resulting from obstetric complications of the pregnant state (pregnancy, labour and puerperium), from interventions, omissions, incorrect treatment or from a chain of events resulting from any of the above.</p> <p>Indirect maternal death: that resulting from previous existing disease or disease that developed during pregnancy and which was not due to direct obstetric causes, but which was aggravated by physiologic effects of pregnancy.</p> <p>For the purpose of international reporting, only those maternal deaths occurring before the end of the 42-days reference period are included.</p>
MATERNAL MORTALITY RATE (percentage)	The number of deaths (female) ascribed to complications of pregnancy, childbirth and the puerperium registered during a calendar year, divided by the number of live births registered during the same year and multiplied by 100.
NEW CASE	Two meanings: <ul style="list-style-type: none"> a. the first time a patient encounters the health service, that is, the first <i>attendance</i> b. a <i>disease</i> which occurs for the first time in a patient
OCCUPIED BED DAYS	Total number of days that beds were occupied by patients over a given period of time.
OPERATION #	Any act performed with instruments or by hands of a surgeon. Includes method, operation, procedure, surgery and technique.
OUT PATIENT #	A patient who comes to the hospital, clinic or dispensary for diagnosis and or treatment but does not occupy a bed.
PANCHAKARMA	Forms part of homeopathic medicine. A mind-body healing experience consisting of five therapeutic measures for detoxifying the body, strengthening the immune system and restoring balance and well-being.
PERCENTAGE BED OCCUPANCY	The percentage of the total number of occupied bed days divided by the total number of available bed days over a given period. Also known as <i>percentage occupancy</i> .
PERCENTAGE CHANGE	Is the increase or decrease (with the minus sign) resulting when comparing figures of current year to that of previous year, which is expressed as a percentage. However, the above does not apply when comparing changes in rates.
PERCENTAGE OF LOW BIRTHWEIGHT	The total number of newborns with a birth weight of less than 2.5 kilograms reported during a calendar year, divided by the total number of live births, expressed as a percentage.
PERCENTAGE OF MATERNAL DEATHS	The total number of maternal deaths reported during a calendar year, divided by the total number of live births, expressed as a percentage.
PERCENTAGE OF NEONATAL DEATHS	The total number of neonatal deaths (early and late) during a calendar year, divided by the total number of live births, expressed as a percentage.
PERCENTAGE OF PERINATAL DEATHS	The total number of perinatal deaths (stillbirths + early neonatal deaths) during a calendar year, divided by the total number of births (live births + stillbirths), expressed as a percentage.

GLOSSARY

PERCENTAGE OF STILLBIRTH	The total number of stillbirths (macerated and fresh) during a calendar year, divided by the total number of births (live births + stillbirths), expressed as a percentage.
PERINATAL DEATH *	Death occurred at 22 completed weeks (154 days) of gestation (the time when birth weight is normally 500 grams), and ends seven completed days after birth.
PROCEDURE	See Operation
PREMATURE/PRETERM *	A newborn with less than 37 completed weeks (less than 259 days) of gestation.
REGION	Refers to one of the five health regions of Mauritius
SESSION @	<p>Period of time during which outpatient clinics or surgeries are regularly held.</p> <p>A morning session (AM) occurs from 9.00 hrs to 12.00hrs on weekdays and Saturdays while an afternoon session (PM) starts from 13.00hrs and ends at 16.00hrs on weekdays.</p> <p>For surgeries, every attendance of the Surgeon at any of the undermentioned times is considered as one session.</p> <p>After Normal Working Hours: from 16.00hrs to 9.00hrs of the following day.</p> <p>Week-end: from 12.00hrs on Saturday up to 9.00hrs of the following Monday morning.</p> <p>Public Holiday: from 00.00hr to 24.00hrs of the same day.</p> <p>Extra session : See above</p>
SORTED OPD	Where patients attend to see the specialist on appointment only.
SPECIALIST #	A health care professional with advanced clinical training, who practises a specific branch of medicine.
STILLBIRTH #	The birth of an infant that has died in the womb, after having survived through at least the 28 weeks of pregnancy, earlier instances being regarded as abortion or miscarriage. It is also referred to as intrauterine fetal death (IUFD). Stillbirth can be macerated or fresh.
SURGERY	See Operation
TRANSFER-IN	Is applicable for transfers from other wards of the same hospital only. Patients received from other hospitals should be considered as admissions at the receiving hospital and as discharges by the sending hospitals.
TRANSFER-OUT	Transfer of patients to other wards within the same hospital
TURNOVER INTERVAL \$	The number of days a bed lies vacant between successive patients. It is obtained by dividing the number of discharges and deaths into the total number of unoccupied bed days.
UNSORTED OPD	Where patients attend for non-urgent health-related problems with or without appointment.
